Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

OPTEK

A subsidiary of TT electronics plc

Optoisolators

OPI1264 Series:

Optically coupled isolators, each consisting of an infrared emitting diode coupled to an NPN silicon phototransistor and sealed in a precast opaque housing.

OPI155 Series:

Contains a high speed monolithic photo-IC comprised of a photo-diode and DC amplifier driving an open collector output Schottky transistor.

† Cut Tape ✔ ***NEW!***

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

*i*Coupler® Digital Isolators

*i*Coupler isolation technology combines the dc isolation properties of microtransformers with semiconductor processing techniques to provide performance, power and integration benefits superior to those offered by traditional optocoupler technology. *i*Coupler components operate at higher data rates, provide better timing accuracy and common-mode transient immunity and operate at lower power levels than optocouplers. They operate over wider temperature and supply voltage ranges than their optical competition. The *i*Coupler technology rescues modern designs from the poorly controlled, temperature sensitive and time-dependent current transfer characteristics of standard optocouplers.

IsoLoop® High Performance Digital Isolators

IsoLoop digital isolators from NVE are superior performance alternatives to traditional opto-couplers or optoisolators. They are available in single, dual and quad channel form factors. IsoLoop bus isolators offer the designer highly compact, isolated RS 485 and RS 422 compliant devices. These high-speed products are ideal for many industrial communication applications, including PROFIBUS.

Features:

IL260E, IL261, IL261E, and IL262E: • 3.3V/5V CMOS/TTL Compatible • 110Mbps Data Rate • 2500Vrms Isolation (1 minute) • 2ns Typical Pulse Width Distortion • 10ns Typical Propagation Delay • 30k/Vμs Typical Transient Immunity

IL422E: • 2500Vrms Isolation (1 minute) • 25ns Propagation Delay • 25MBd Data Rate • 1ns Pulse Skew • ±60mA Driver Output Capability • Thermal Shutdown Protection • Meets or Exceeds EIA 422-B, EIA 485-A and ITU Recommendation VII • UL 1577 Approval (pending)

IL41050TE: • 2500Vrms Isolation (1 minute) • 30kV/μs Transient Immunity

IL485E, IL485W, and IL485WE: • 35MBd Data Rate • 25ns Propagation Delay • 2500Vrms Isolation (1 minute)

IL510, IL511, IL514, IL515, and IL516: • 2Mbps Maximum Speed • External Clocking Option (IL510 and IL515) • 10ns Pulse Width Distortion • 25ns Propagation Delay

IL610, IL610E, IL611E, IL612E, IL613E, and IL614E: • 40Mbps Data Rate • Open Drain or CMOS Outputs • Low Power Dissipation • Failsafe Output (Logic high output for zero coil current)

IL610A, IL610AE IL611AE, and IL612AE: • 10Mbps Data Rate • Open Drain or CMOS Outputs • Low Power Dissipation • Failsafe Output (Logic high output for zero coil current)

IL710, IL710E, IL710T, IL711, IL711E, IL711T, IL712E, IL712T, and IL721: • 100-110MBd Data Rate • 2ns Typical Pulse Width Distortion • 10ns Typical Propagation Delay • 30kV/μs Transient Immunity • 2500Vrms Isolation (1 minute)

IL715, IL715E, IL715T, IL716, IL716E, IL716T, IL717, IL717E, and IL717T: • 100MBd Data Rate; T-Series: 110MBd Data Rate • 2ns Typical Pulse Width Distortion • 10ns Typical Propagation Delay • 30kV/μs Transient Immunity; T-Series: 30kV/μs Transient Immunity • 2500Vrms Isolation (1 minute)

IL3185E, IL3185, IL3122E and IL3122: • 5Mbps Data Rate • 2500Vrms Isolation (1 minute) • 40ns Typical Propagation Delay

IL3285E, IL3285, IL3222E and IL3222: • 5Mbps Data Rate • 6ns Typical Pulse Skew • 2500Vrms Isolation (1 minute) • 40ns Typical Propagation Delay • 20kV/μs Typical Common Mode Rejection

IL3485, IL3422E and IL3422: • 20Mbps Data Rate • 2500Vrms Isolation (1 minute) • 40ns Typical Propagation Delay

IL3585E: • 40Mbps Data Rate • 5ns Pulse Skew • 20ns Propagation Delay • 20kV/μs Typical Common Mode Rejection • 2500Vrms Isolation (1 minute)

NKK SWITCHES

Contactless Tilt Switches

DSB SERIES:
Photointerrupter, rather than contacts, ensures high reliability. Sealed construction for protection from environmental elements, including hydrogen sulfide, sulfur dioxide, and nitrogen hydroxide. Terminals are made of ammonia resistent materials. The switch is triggered when tilted beyond 30° in any direction

Specifications: • Mechanical and Electrical Life: 150,000 Operations Minimum • Forward Current: 20mA • Forward Voltage: 1.3V • Operating Temperature: -25°C ~ 80°C

Note: Prevent exposure to magnetic fields. Do not install switch near vibration source.

DSA SERIES:
Environmentally friendly, contains no mercury • High contact reliability due to sealed body • The switch is triggered when tilted beyond ±10° of the horizontal **Specifications:** • Resistive Load: 0.1A@ 12VDC • Mechanical Life: 100,000 operations minimum • Operating Temperature: -10°C ~ 70°C

TOSHIBA

Leading Innovation

Illumination Sensors and Photointerrupter

Dim in mm

Illumination Sensors: SMD Photo-ICs for illuminance sensor which consist of one chip integrated photo-diode and amplifier circuit **Features:** • Small SMD package • Suitable for lead-free soldering and reflow soldering • Low supply voltage: VCC = 2.7V~5.5V

Photointerrupter: Consisting of GaAs infrared LED and Si phototransistor with gap width as wide as 5mm **Features:** • High response speed: tr, tf=15µs (typical) • Package material: Polybutylene terephthalate

LITEON Infrared Emitting Diodes, Photodetectors and Photodiodes

FEATURES: Infrared Emitting Diodes: • Selected to specific on-line intensity and radiant intensity ranges • Low cost plastic end looking package • Made with gallium aluminum arsenide window layer on gallium arsenide infrared emitting diodes **Photodetectors and Photodiodes**: • Lensed for high sensitivity • Low cost plastic package

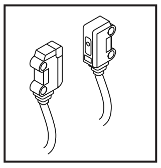
OMRON

Amplified Mini Optical Sensors with Pin Point Beam



• Miniature optical sensor with "Pin-point" beam for sensing minute objects (1-2mm diameter) • Use both indoors or outdoors for detecting where small body size is desired • Perfect for security, conveyor detection as well as emergency stop detection and limit control and more • Sensor not affected by ambient light • Comes standard with 2 meter molded cords attached • Terminal Type: 2m Cable

Amplified Optical Sensors

- One meter sensing distance
- Supply voltage of 5 ~ 24VDC for easy interface with TTL circuits, relays and programmable controllers
- IP60 sealability rating. Comes with (2) – 2m cables with connectors

Long Distance Amplified Optical Sensors

Fig. 1 — Horizontal

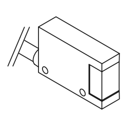

Fig. 2 — Vertical

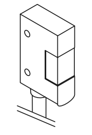

These general purpose optical sensors are small DC Sensors (10 ~ 30VDC Input) available in both a transmitter-receiver pair or a reflected beam type with sensing distances of 23 feet (7 meters). Ideal for conveyor systems and doorway sensing with direct interface to PLC's. Meets NEMA 4X, 6 and IP67 standards. Through-beam sensors include separate transmitter and receiver. Reflective sensors include transceiver and E39-R1 reflector. Horizontal mount sensors include mounting bracket. All sensors include mounting hardware.

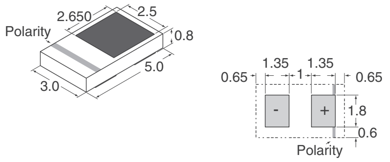
TDK

Visible Radiant Optical Sensors — Photodiodes

Dimensions in mm



These photodiodes use an amorphous silicone semiconductor on the glass substrate. They are the most suitable for brightness adjustment and control of lighting systems.

FEATURES: • Highly receptive to visible light but not receptive to infrared light (close to human eye visibility) • Accurate illumination measurement can be taken without the use of an infrared filter

SPECIFICATIONS: • Operating Temperature: -20°C ~ 85°C • Spectral Sensitivity Area: 350 ~ 750nm • Peak of sensitivity: 580nm ±20

APPLICATIONS: • Brightness control for LCD, EL, and CRT • Brightness control for keypads (e.g., mobile phones) • Positioning scan line for rear projection TV • Exposure adjust for compact camera • Sub exposure adjust for digital camera

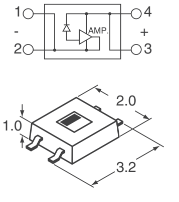
Panasonic

Panasonic Electric Works

Light Sensor — NaPiCa

Dim. in mm



(SMT Shown)

FEATURES: • Built-in optical filter for spectral response similar to that of the human eye • Photocurrent is proportional to illumination (linear output) • Uses environmentally friendly silicon chips • Operates on 1.5 ~ 6VDC, which is suitable for battery operation.
APPLICATIONS: • Brightness detection for LCD backlight control for LCD devices (mobile phones, LCD TVs, Car navigation systems, mobile PCs and PDAs) • Brightness detection for circuits in household lighting, crime prevention lighting and automatic lighting for bicycles **RATINGS:** • **Photocurrent:** 5mA • **Operating Temperature:** -30°C ~ 85°C • **Reverse Voltage:** Minimum 1.5V, Maximum 6V • **Dark Current:** 0.3μA @ 5V

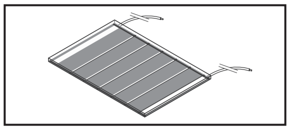
NEW! SANYO SEMI Amorphous Silicon Solar Cells



Compared to crystal silicon solar cells with firm shape of atoms, Amorphous silicon solar cells with random shape of atoms have the advantages of thinness and flexibility, which can be embedded into various products. Though Amorphous silicon solar cells have lower conversion efficiency in outdoor light, they have higher performance under indoor light because of its lower illuminance dependency.

OMRON® Amplified Optical Sensors

Omron's optical sensors are designed to meet the needs of positioning, detection, robotic controls and presence detection. Amplified sensors are not influenced by internal or external lighting and can be powered by a wide supply voltage. Great for plug and play applications such as conveyor sensing and directly interfacing with PLC and Industrial controllers.

Unamplified Optical Sensors

Omron's unamplified optical sensors are low cost detection sensors for design in processes. Inputs generally require a current limiting resistor and care must be taken with reducing external lighting influences. Outputs switch at very high speeds and operating lifetimes extend beyond 10,000 operating hours.

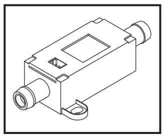
OMRON

D6F Gas Flow Sensors



The D6F is a new supersensitive gas flow sensor. It is able to measure both gas velocity and direction at extremely low flow rates, and is ideal for looking at low pressure medical gases, boiler emissions, and HVAC system airflow. It is suitable for measuring the amount of oxygen and nitrogen dioxide, consumed from a respiratory apparatus in surgery. It can also be used for monitoring air circulation in a building and thus improving the performance and efficiency of air conditioning and building comfort systems. The extreme sensitivity is achieved with a tiny heating element, associated with temperature sensors on both sides. The deviation is temperature measured by the two sensors and used to calculate the gas flow and direction, generating a non-linear analogue output in the range of 1V ~ 5V.

* Liquid Natural Gas † D6F-05 is a 1/4" pipe thread version using British Taper (Rc) standard.

D6F Air Flow Sensors

Omron's mass flow sensor will detect flows of 1 ~ 10 liters per minute up to a 1 ~ 50 liter per minute version. They use a wide supply voltage range of 5 ~ 26.4VDC and will output an analog voltage of 0.5 ~ 5VDC. Perfect for medical apparatus, fuel cell monitoring and measuring instruments.

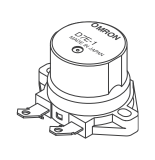
D7E Vibration Sensors

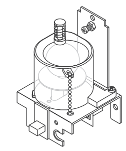


These vibration sensors are perfect for quick detection of movements that could cause damage to equipment or can be used to safely shut down critical operations. Sensors are auto-resettable and require no manual resetting. D7E vibration sensors are low cost sealed vibration sensors with various sensitivities. Use these sensors for industrial equipment, cranes, forklifts, industrial manufacturing and boilers. Use in natural gas meter shutoffs, vending machines, conveyor systems, earthquake sensors or any circuits that require safety shutoff during a period of vibration or tilting.

Specifications: • Various sensitivities • Contact Capacity: 100mA@5-30VDC • Contact Form: SPST-NC • Operating Temperature: -25°C ~ 60°C • Dielectric Strength: AC250V 50/60Hz

Description	Digi-Key Part No.	Price Each 1	25	50	Omron Part No.
130 ~ 200 gallon Vibration Switch, 0.1A	Z2007-ND	12.00	10.80	9.60	D7E-1
100 ~ 170 gallon Vibration Switch, 0.1A	Z2008-ND	12.00	10.80	9.60	D7E-2
50 ~ 80° Tilt Switch, 0.1A	Z2009-ND	17.51	15.76	14.01	D7E-3

D7H Equipment Vibration Sensors

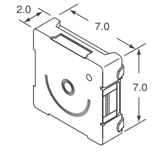


These vibration switches feature a highly durable stainless steel diaphragm that allows detection of very small movements. Used to prevent secondary damage after earthquakes and to replace mercury with a simple mechanical system. Manually resettable, vertically mounted sensor in either an enclosed case or open sensor.

Specifications: • 100 ~ 170 gallon, 10A 125VAC, 0.1A 30VDC • Operating Temperature: -10°C ~ 70°C

Description	Digi-Key Part No.	Price Each 1	25	50	Omron Part No.
Open Cased Vibration Detection Switch - 10A	Z2011-ND	90.24	81.22	72.19	D7H-B1

D6BN Tilt Sensors



Ideal for equipment tilt detection. Will give you a separate output when tilted left or right. Perfect for signaling a screen to rotate from portrait to landscape view in keeping with product orientation. Can be used in space heaters.

Specifications:

- Output Current: 1mA • Operating Temperature: -10°C ~ 60°C

Characteristics:

- Supply Voltage: 2.4V ~ 3.6V • Output High Voltage: Vdd ~ 0.4V minimum • Output Low Voltage: 0.4V maximum • Current Consumption: 10μA maximum • Operating Angle: 40°C ~ 80°C

Description	Digi-Key Part No.	Cut Tape Price Each 1	25	50	Omron Part No.

‡ Tape and Reel

Inductive Proximity Sensors

Omron's line of inductive sensors are designed for detecting the presence or absence of ferrous metal close to the sensor and provide an output when detected. Because inductive sensors use electromagnetic fields, they excel over photo type sensors in environments containing water, oil, dust and dirt. Shielded sensors are made with a shielding plate around the ferrite core to focus ferrous metal sensing at the sensors head. It also allows the sensor to be located or mounted close to surrounding metals.

Panasonic®

Photo Interrupter

Photo Interrupters are a transmissive photosensor series in which a high efficiency GaAs infrared light emitting diode is used as the light emitting element, and a high sensitivity photo transistor is used as the light detecting element. The two elements face each other, so an object passing between them is detected.

Melexis Microelectronic Integrated Systems

Programmable Linear Hall Effect ICs

Features:

- Quad switched/chopper stabilized
- Ratio metric output for A/D interface
- Adjustable quiescent voltage (V_{OQ})
- Very low quiescent voltage temperature drift
- Adjustable sensitivity
- Adjustable temperature compensation of sensitivity

HAMLIN Hall Effect Sensors

Hamlin's Hall Effect Sensor technology offers unique design benefits. In applications where high speed switching is required, speeds of up to 10KHz can be reached. The component package is small compared with other sensing technologies and the sensors can be specified with either a digital or analogue output.

MAGNASPHERE® Magnetic Switches

The patented, award-winning MAGNASPHERE switch represents the first break-through in two-wire magnetic switch technology since the introduction of the reed switch. Originally designed as a replacement for the reed switch used in security systems, the MAGNASPHERE switch exhibits a wide range of characteristics that make it an ideal solution for many industrial and commercial OEM applications.

Features: • Hermetically sealed contacts • Magnetic anti-tamper • High voltage EMI resistance • Wide operating temperature range • Intrinsically safe for use in volatile atmospheres • Available in form A (normally open) and form B (normally closed)

Honeywell
Sensing and Control

VRS and Hall Effect Speed Sensors

VRS Sensors are for high speed sensing applications where higher output voltages are needed. **Hall Effect Speed Sensors** are designed for use with a ferromagnetic gear or pole wheel to generate impulse frequencies proportional to the speed of the target.

Panasonic Hall Effect Sensor ICs

Panasonic's Hall IC is a combination of a Hall element, amplifier, Schmidt circuit, and stabilized power supply/temperature compensator integrated on an identical chip by using the IC technology. It amplifies Hall element output at the amplifier, converts into a digital signal through the Schmidt circuit, and drives the TTL or MOS IC directly. **Features:** • Stable temperature characteristics due to the additional temperature compensator • TTL and MOS ICs directly driveable by output • Semi-permanent service life due to no contact parts • Small change of the operating flux density against mechanical stress • Open Collector Output • Operating Temperature: -40°C ~ 100°C • Supply Current Maximum: 6mA • Output Circuit Maximum: 20mA **Applications:** • Speed Sensors • Position Sensors • Rotation Sensors • Keyboard Switches • Microswitches

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Reflective Photosensors

Reflective Photosensors consist of a high efficiency GaAs infrared light emitting diode which is integrated with a high sensitivity phototransistor in a single resin package.

§ Halogen lamp light source

Panasonic

PIR Motion Sensors

RoHS COMPLIANT

Panasonic Electric Works

MP motion sensors are passive infrared sensors which detect changes in infrared rays when there is movement from a person or object. Intended as human body and animal detection with the world's smallest built-in amplifier design and small size. Perfect for connecting directly into a microprocessor.

Sensor Types: • Standard Detection for most general purpose movement detection • Slight Detection for movements as low as 7.8" • Spot Detection for detecting movements in a much smaller area or focused spot. • 10 Meter Detection for long distance, wide area movement detection **Output Types:** • Digital for automated On-Off controls, energy saving for vending machines, ATMs, video games and theme parks • Analog for fine motion detection, slight movements and small detection • Lens color does not affect sensor operation

PCB Mount Pressure Sensors

Dim. in mm

The **24PC Series** miniature pressure sensors provide reliable gage and absolute pressure sensing performance in a compact package. The low power, non-amplified, non-compensated Wheatstone bridge circuit design provides inherently stable mV outputs over 0.5 ~ 250 psi sensing ranges. **Features:** • 1ms Response time • Supply Voltage: 10.0 ~ 12.0 VDC • Operating Temperature: -40°C ~ 85°C

The **26PC Series** miniature pressure sensors provide reliable gage and differential pressure sensing performance in a compact package. The low power, non-amplified, non-compensated Wheatstone bridge circuit design provides inherently stable mV outputs over 1.0 ~ 250 psi sensing ranges. **Features:** • 1ms Response time • Supply Voltage: 10.0 ~ 16.0 VDC • Operating Temperature: -40°C ~ 85°C

AWM Airflow Sensors

The **AWM1000 Series** mass flow sensor provides all of the outstanding performance benefits of the standard AWM2000 series in a more cost-effective sensor platform **Features:** • Cost-effective micro-bridge technology • Accurate, repeatable airflow sensing • Bidirectional sensing capability

The **AWM2000 Series** micro-bridge mass airflow sensor is a passive device comprised of two Wheatstone bridges **Features:** • Bidirectional sensing capability • Actual mass airflow sensing • Low differential pressure sensing

NEW! Zephyr™ Digital Airflow Sensors

RoHS COMPLIANT

Features: • High ±2.5% accuracy allows for very precise airflow measurement, often ideal for demanding applications with high accuracy requirements • High stability reduces errors due to thermal effects and null shift to provide accurate readings over time, often eliminating need for system calibration after PCB mount and periodically over time • Fast response time allows a customer's application to respond quickly to airflow change, important in critical medical (i.e., anesthesia) and industrial (i.e., fume hood) applications • ASIC-based 1^2C digital output compatibility eases integration to microprocessors or microcontrollers, reducing PCB complexity and component count

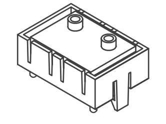

Fig. 2

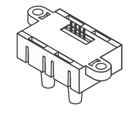

Digital Pressure Gauges — SDPGB Series

Features: • ±0.25% Test Gauge Accuracy • 316 Stainless Steel Sensor • Long Battery Life (Two AA Alkaline approximately 2,500 hours) • Rugged Design • Display: 3 1/2" digit LCD, 1/2" Digit Height • Auto Shut off Time • Low Battery Indication • Media Compatibility: All wetted parts are 316 SS compatible with most liquids and gases

Pressure Transducer

RoHS COMPLIANT

The MEDIAMATE® pressure transducer provides the corrosion resistance of stainless steel at low OEM pricing. It is fully compensated and completely interchangeable without further calibration. It is being used with a wide variety of corrosive media such as Freon, ammonia, water, and hydraulic fluids.

HOBBS

Pressure and Vacuum Switches — 5000 Series

RoHS COMPLIANT

The 5000 Series switches are specifically designed to stand up to extended duty applications. It features a Kapton diaphragm for compatibility with a wide variety of fluids. These switches are factory set. The pressure switches are field adjustable.

Specifications: • Pressure Switch Proof Pressure: 500 PSI • Pressure Switch Burst Pressure: 750 PSI for 0.5 ~ 24 PSI; 1, 250 PSI for 25 ~ 150 PSI set point range • Vacuum Switch Proof Pressure: -30" Hg • Temperature Range: -40°C ~ 121°C (-40°F ~ 250°F) • Connector: 1/8" - 27" NPT male thread • Terminals: #8 - 32 screws

Honeywell
Sensing and Control

Pressure Sensors

Pressure sensors, force sensors and airflow sensors are all developed around semiconductor technology. Each pressure sensor contains a silicon chip with an integral sensing diaphragm and four piezoresistors. Pressure applied on the diaphragm causes it to flex, changing the resistance. This causes a low level output voltage proportional to pressure. Airflow sensors contain a thin-film, thermally isolated bridge structure containing heater and temperature sensing elements. The bridge structure provides a sensitive and fast response to the flow of air or other gas over the chip.

MediaSensor™ P51 Pressure Transducers

Description: This family of bulk micro-machined, absolute, gauge and sealed pressure transducers and transmitters are for both harsh and benign media with a total error of ±1% and are well suited for a variety of automotive, industrial and commercial applications. **Features:** • Robust Package: All laser-welded stainless steel design for optimal media isolation • Maximum Flexibility: Custom ASIC provides signal conditioning for calibration and temperature compensation • Temperature Range: -40° ~ 105°C • Response Time: <1ms • Connector: I36 - 36" Integral Harness • No O-Rings • 316L Stainless Steel Construction

Note: More Product available on-line. For pricing and availability, visit our website.

Digital Fluid-Trac™ Ultrasonic Drum Level Gauge

Description: This drum level gauge is a cost competitive non-contact continuous liquid level drum gauge. Designed for use on 55 gallon vertical drums storing a wide variety of media such as water, waste water, motor oil, hydraulic fluid and diesel fuel. **Features:** • Fits NPT openings (2" or 3/4") • Accurate to 1 gallon with a resolution of +/- 0.5 gallon • Powered by two 9V batteries (not included)

MediaGauge™ Digital Pressure Gauges

Specifications:

• Package: NEMA 4X Rating • Operating Temperature: -10°C ~ 60°C (-14°F ~ 140°F) • Output Type: 4 Digit LCD • Keypad Operated Functions: Auto Zero and Peak Hold • Port: 1/4 - 18 NPT

Additional Specifications: MG-MD:
4-20mA Current option and High and Low Pressure Set points **MGA-9V:** Air Only

Honeywell

Integrated Pressure Transducers

Honeywell's Integrated Pressure Transducer (IPT) provides high accuracy pressure data in an industry standard SPI digital format.

Applications:
• Altimeters • Cabin Air Pressure • Flight Test Systems • Meteorology • Instrumentation and Analytical Equipment

Features and Benefits:
• Digital SPI Output • Industry Standard Interface: Ready communication between a µController/µProcessor and the IPT • Media Interface: Handles most dry gas media

SMC®

Pneumatic Automation Components

SMC Corporation is the largest manufacturer in the world of pneumatic automation components. SMC's line of fluid power and pneumatic instrumentation products include vacuum and pressure sensors, switches, gauges, electro-pneumatic regulators and digital flow switches/sensors for air, water and chemicals.

Pressure Range	Proof Pressure	Pressure Type	Port	Supply Voltage (VDC)	Max. Supply Current (mA)	Output	Operating Temperature °C	Digi-Key Part No.	Price Each	SMC Part No.

CUI INC Current Sensor

The SCD series current sensors are PC board mounted, Hall effect, open-loop devices which output a voltage equivalent to the magnitude of current sensed.

Capable of detecting DC current and AC currents where ± input currents are represented as a + voltage only.

LEM Closed/Open Transducers

LTS xx-NP/LTSR xx-NP: Closed loop (compensated) multi-range current transducer using the Hall effect, unipolar voltage supply, compact design for PCB mounting, isolated plastic case recognized according to UL94-VO, incorporated measuring resistance, and extended measuring range.

LA 20-PB: Closed loop (compensated) current transducer using the Hall effect, voltage output, and printed circuit board mounting.

LAH 25-NP, LAH 50-P, LAH 100-P, LA 55-P and LA 100-P: Closed loop (compensated) multi-range current transducer using the Hall effect, printed circuit board mounting, insulated plastic case recognized according to UL94-VO.

LA 150-P/ LAX 100-NP: Closed loop (compensated) current transducer using the Hall effect, and printed circuit board mounting.

CAS/CASR-xx-NP: Closed loop (compensated) multi-range current transducers. Compact Fluxgate based current transducer single supplied (+5V). Three primary pins. (CASR = with reference access)

CKSR-xx-NP: Closed loop (compensated) multi-range current transducers. Compact Fluxgate based current transducer single supplied (+5V) with reference access. Four primary pins.

LV xx-P: Closed loop (compensated) voltage transducer using the Hall effect, and insulated plastic case recognized according to UL94-VO.

HXS xx-NP: Small packaged O/L, ASIC based with +5V supply. Four primary bus bars can be connected in parallel or series for flexibility.

HAIS xx-P: PCB mount with aperture. O/L ASIC based with +5V supply. Range is from 50A thru 400A. Programmable offset and gain. Wide temperature range of -40°C ~ 125°C.

HAIS xx-TP: PCB mount with primary bus bar. O/L ASIC based with +5V supply. Range is from 50A, 75A and 100A. Programmable offset and gain. Wide temperature range of -40°C ~ 125°C.

HX xx-P: Small, cost effective PCB mount package that ranges from 3A thru 50A. Isolated with DC/AC/Pulse measurements.

HTB xx-P: PCB mount with aperture. Small package O/L with range form 50A thru 400A. Isolated with DC/AC/Pulse measurements.

HTB xx-TP: PCB mount with primary bus bar. Small package O/L with range of 50A, 75A and 100A. Isolated DC/AC/Pulse measurements.

HAS xx-S: Panel mount O/L. Isolated and can measure DC/AC currents at range of 50A thru 600A. Measuring range to 3 times nominal.

HAS xx-P: PCB mount with aperture. Isolated and can measure DC/AC currents at range of 50A thru 600A. Measuring range to 3 times nominal.

HASS xx-S: Panel mount O/L ASIC based device that can measure DC/AC current at 50A thru 600A. Unipolar +5V supply with accuracy of 1%.

HMS xx-NP: Surface mount O/L ASIC device with +5V supply. Measuring range from 5A thru 25A.

TT xx-SD: Split core transducer for the electronic measurement of AC waveform currents, with galvanic isolation between the primary circuit (power) and the secondary circuit (measurement).

AT xxx B10: Split core transducer for the electronic measurement of AC waveform currents, with galvanic isolation between the primary circuit (power) and the secondary circuit (measurement).

APR xxx B10: Split core transducer for the electronic measurement of AC currents (all waveforms). Switch selectable measuring ranges.

DHR 100 C10/200 C420: The transducer for the electronic measurement of DC and distorted AC waveform currents.

N

SMD Current Transducer

The Minisens transducer is an ultra flat SMD open loop integrated circuit current transducer based on the Hall effect principle. The IC is calibrated to minimize offset and temperature drifts. **Advantages:** • Low cost • Excellent Linearity

Current Sensors

Digital Current Sensors

Micro Switch CS series digital current sensors provide a logic level output that changes from approximately Vcc ~ 0.4 volts when the sensed current exceeds the operate point. Each digital sensor will operate on AC or DC current, but the output will turn off at every zero crossing when sensing AC current. Housing material: PET polyester
Specifications: • Operating Temperature Range: -25°C ~ 85°C • Operating Volts: 0.4V • Response time: 100µ Sec.

CSL Series Open Loop Current Sensors

CSL Series miniature, open-loop current sensors incorporate the SS490 Series miniature ratiometric linear Hall-Effect sensor (MRL™). The sensing element is encapsulated in a printed circuit board-mountable plastic package. The combination of sensor, flux collector and housing comprises the current sensor assembly. These sensors are ratiometric.
Specifications: • Operating Temperature Range: -25°C ~ 100°C • Supply Voltage: 4.5 ~ 10.5

Current Sensors

Remote Current Indicators

CR Magnetics Remote Electrical Current Indicators provides an effective method for remote monitoring of electrical current. When the current exceeds the turn-on point of the sensing transformer, the LED illuminates to indicate the presence of current. **Specifications: • Indicating Range:** 2.5 ~ 100 Amps (1-Wire Pass) **• Minimum turn-on point:** 2.5 Amps **• Maximum Continuous Current:** 100 Amps

Transducers / Transmitters

CR4100 Series: Designed for applications where AC current waveforms are not purely sinusoidal. These devices are ideal in chopped wave and phase fired control systems.

CR4210 Series: Calibrated to provide a 0 ~ 5VDC and 0 ~ 10VDC signal that is proportional to the average RMS input AC current.

CR4200 Series: Produces a calibrated 4 ~ 20mADC signal that is proportional to the average RMS input AC current. The output signal is generated from a user supplied 24VDC power supply within the output current loop.

CR4400 Series: Designed to provide a DC output proportional to the AC current input.
CR5200 Series: Designed to provide a DC signal which is proportional to a DC sensed current. The ranges 2 ~ 10 Amp utilize an advanced Magnetic Modulator technology and the ranges 20 Amps and above utilize Hall Effect technology.
CR4500 Series: Designed for applications where AC voltage waveforms are not purely sinusoidal
CR5300 Series: Designed to provide an output DC signal that is proportional to the input DC voltage.
CR6600 Series: Designed to give a DC output that is proportional to an input frequency value.

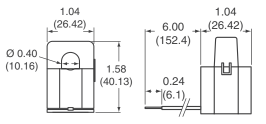
Split-Core Current Transformer

The **CR3110** Split-Core Current Transformer is designed to provide a low cost method to monitoring electrical current. A unique hinge and locking snap allows attachment without interrupting the current-carrying wire.

Specifications:
- **Maximum Continuous Primary Current**: 75 AAC
- **Secondary Turns:** 3000
- **DC Resistance:** 460Ω @ 20°C
- **Frequency:** 50 ~ 60Hz

Dimensions in Inch (mm)



Digi-Key Part No.	Price Each 1	10	25	CR Magnetics Part No.
582-1004-ND	14.80	12.58	11.84	CR3110-3000

Low Cost Current Sensors

Specifications:
- **Accuracy:** ±.5% Full Scale
- **Ripple:** 1% Maximum
- **Signal Out:** 0-5 Vdc
- **Output Load:** 1.0MΩ or greater for rated accuracy
- **Response Time:** 250ms Maximum 10 ~ 90% Full Scale
- **Frequency:** 50 ~ 400Hz (All specifications for operation @ 60Hz)

Sensors

CR4395 Series: Current Sensing Relay that provides an effective and highly stable method for monitoring electrical current. The current-carrying wire is routed through the opening extending from the top of the case. When current reaches the level set by the trip point adjustment, the relay trips and starts the adjustable timer. After the timer cycles the electromechanical relay is energized.

CR5395 Series: Direct Current Sensing Relay that provides a precision and cost effective method for monitoring direct current. Magnetic Modulator Technology is utilized for the current sensing to provide a stable and highly repeatable current trip. The current-carrying wire is routed through the opening extending from the top of the case. When current reaches the level set by the trip point adjustment, the relay trips and starts the adjustable timer. After the timer cycles the electromechanical relay is energized.

CR7310 Series: Ground Fault Sensor that provides a reliable and cost effective method for sensing ground faults. The current-carrying wires are routed through the opening extending from the top of the case. When ground current reaches the level set by the trip point adjustment, the relay trips, illuminates the tripped LED and provides an output signal.

TRIP STATUS:

EH: Energized on High, trips when sense current is above trip point and returns to non-trip status when sense current is below the trip point.

EL: Energized on Low, trips when sense current is below trip point and returns to non-trip status when sense current is above the trip point.

A hall effect current sensor measures the magnetic flux which is produced proportionally to the current without any contact with the primary circuit. This results in no voltage drop in the measured circuit which provide excellent galvanic isolation.

Features: • Galvanic isolation between primary and measuring circuit, measures DC or AC (kHz) • Zero insertion loss • Quick response

Specifications (measured at Input Voltage and @ 25°): • Frequency Band Width (-3dB): L01Z, L03S, L08P, L18P: DC-50kHz; L07P: DC-35kHz • Output Linearity: ±1% • Operating Temperature: -10°C ~ 80°C • Insulation Resistance @ 500VDC: ≥500MΩ - di/dt • Response Time: 5µ Sec. Typ. (10µ for L08P Series) • Load Resister: 10kΩ 3mW minimum.

Closed Loop Multi-range Current Sensors

Closed loop (compensated) current sensor provides an exact duplication of the primary current scaled by the number of turns in the secondary coil. Each multi-range sensor has a nominal sensing current but can be changed by configuring the primary pins. The sensing current can be scaled down by 1/2 or 1/3 the nominal output sensing current, which gives you the flexibility to sense 3 different current ranges with only one part.

Specifications (measured at input voltage and 25°C): • Frequency Bandwidth S22P(1dB): DC-200kHz (at higher frequencies derating is required to prevent core from overheating) • Output Linearity: ±0.25% • Operating Temperature: -10°C ~ 85°C • Insulation Resistance @ 500VDC: ≥ 500mΩ • Response Time: 1µSec. • Load Resistor 10kΩ 3mW Minimum

Current Transformer Standard Accuracy Low-Cost 50/60 Hz

Applications:

• Sensing current overload • Ground fault detection • Metering

Notes:

• RCF: Ratio Correction Factor. Multiply current readings by this factor to compensate for transformer losses. • Data is deemed reliable at the time of publication, but may be subject to change without notice.

Cherry magnetic sensors are used to detect changes in magnetic field polarities and the motion of ferrous metals such as gear tooth movements. Used for such applications as speed and proximity sensing, magnetic polarity detection and current flow monitoring. Solid state design for unlimited life.

Features:

MP100 Series:

- Aluminum threaded barrel sensor for speed and position sensing
- The threaded barrel allows precise positioning and adjustment

GS100 Series:

- Barrel sensors intended for gear tooth speed sensing
- High speed capability, ideal for sensing power gears, conveyer speed and other rotating gears
- Built-in magnet supplies its own bias field
- GS101202 is plastic housing with steel bushing

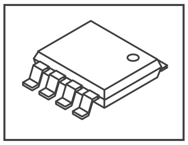
Honeywell Sensors

Linear / Angular / Rotary Displacement Sensors – HMC1501 / HMC1512



High resolution, low power MR sensor capable of measuring the angle direction of a magnetic field from a magnet with <0.07° resolution. Output is typical Wheatstone Bridge

Features: • No "rare earth" magnets; functions with Alnico or ceramic type magnets • Linear range of 8mm with two sensors mounted on two ends; range may be increased through multiple sensor arrays operating together • Absolute sensing ability to know exact position and require no indexing for proper positional output • No moving parts to wear out • 8-pin SMT package • Case dimensions (exclusive of pins) of 5mm x 4mm x 1.2mm total mounting envelope, with pins of less than 6mm square • Full scale output range of 120mV with 5V of power supply.

Applications: • Linear Displacement • Angular Displacement • Motor Control • Valve Position • Proximity Detection • Current Spike Detection. **Specifications** (at 25°C except stated otherwise)**:** • **Typical Bridge Supply:** 5V, Vbridge referenced to GND • Sensitivity Vbridge =5V, field 80 Oe**:** 2.1mV/° @ zerocrossing; 1.8mV/° @ zero crossing, averaged in the range of 45° • **Typical Peak-to-Peak Voltage:** 120mV, Vbridge=5V, field=80 Oe • **Bandwidth:** 0MHz ~ 5MHz, Magnetic signal • **Typical Hysteresis Error:** 30µV°, 1.7x10^{-2} mV°, Magnetic field ≥saturation field, Vbridge = 5V

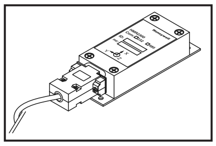
Smart Digital Magnetometer – HMR2300



Microcontroller-Based Smart Sensor with range of ±2 Gauss; <70µGauss Resolution. Has high accuracy over ±1 Gauss; <0.5%FS; and Output Rate Selectable of 10 to 154 Samples/Sec. This sensor has a three-axis digital output, BCD ASCII or Binary, RS-232 Serial Output (9600 or 19200), and a 9-pin D-Sub connector.

Applications: • Compassing – Avionics and Marine • Remote Vehicle Monitoring (Roll/Pitch/Yaw) • Process Control • Laboratory Instrumentation • Anomaly Detection • Traffic and Vehicle Detection • Security Systems. **Specifications:** • **Supply Voltage:** 6.5V ~ 15V; Pin 9 referenced to Pin 5 • **Typical Supply Current:** 27mA; Vsupply=15V, with S/R=ON • **Operating Temp:** -40°C ~ 85°C; Ambient • **Field Range:** ±2 gauss; Full scale (FS) - total applied field • **Typical Linearity Error:** 1%FS; Best fit straight line at 25°C ±2 Gauss • **Typical Hystereis Error:** 0.01%FS; 3 sweeps across ±2 Gauss @ 25°C • **Minimum Resolution:** 67µgauss; Applied field to change output. (Units: 1 gauss (G) = 1 Oersted (in air), 1G=79.58A/m, 1G=10E-4 Tesla, 1G=10E5 gamma)

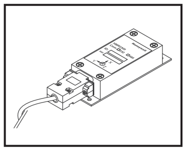
Digital Compass Module – HMR3000



Electronic compass module that provides heading, pitch and roll output for navigation and guidance systems. This solid state magnetoresistive sensors make this strapdown compass both rugged and reliable. This compass provides fast response time up to 20Hz and high heading accuracy of 0.5° with 0.1° resolution.

Features: • Built with solid state magnetic sensors and no moving parts improves response time, allowing faster updates compared to gimballed fluxgates • Available as a circuit board 1.2" x 2.95", weighing less than one ounce, or in an aluminum enclosure • Operates with less than 35mA, allowing for long operation with a battery • Accuracy better than 0.5° with 0.1° resolution for critical positioning applications • Tilt range of ±40° for both the roll and pitch allows operation for most applications • Calibration routines to compensate for distortion due to nearby ferrous objects and stray fields, such as vehicles • User settings of baud rate, update rate, output format, units, filter settings, deviation angles, alarms, and warnings are stored internally in non-volatile memory.

Specifications: • **Typical Supply Voltage:** 5.0VDC regulated, 6-15VDC unregulated • **Typical Power:** 35mA @ 6VDC Normal Operation, 13mA STOP Mode, 2.0mA SLEEP Mode • **Serial:** RS-232 / RS-485 (Half Duplex) • **Baud Rate:** 1200 ~ 38400 bps

Serial Output	Description	Digi-Key Part No.	Price Each	Honeywell Part No.

Digital Compass Module – HMR3200/3300

Electronic compassing solutions that provide heading information for use in navigation and guidance systems. Magnetoresistive sensors are utilized to provide the reliability and accuracy of these small, solid state compass designs. These compass solutions are easily integrated into systems using a UART interface in ASCII format.

Features: Accuracy: 1° heading accuracy, 0.1° resolution and 0.5° repeatability. **Tilt Range:** The HMR3300 may be operated up to a ±60° tilt range for both pitch and roll. Accuracy and performance are enhanced over a wider range of operating conditions and applications with this feature. The HMR3200 is not tilt compensated. Performance is optimized in horizontal or vertical orientations. **Low Power:** Typical operating current is 18mA for the HMR3200. **Response Time:** The HMR3200 has 15Hz response time for faster updates compared to gimballed, mechanical fluxgate compasses.

Specifications: • **Magnetic Field:** Range: ±2 gauss typical, Resolution: 0.1 mgauss • **Electrical:** Input Voltage: Unregulated: 6VDC ~ 15VDC, Regulated: 5.0Vdc • **Interface:** UART - User selectable baud rate 2400 ~ 19200 baud • **Physical:** Dimensions - Conditions: Circuit board, 1.0" x 1.45" x 0.4" (25.4 x 36.8 x 11 mm)

Digital Compass Solution

The Honeywell HMR3400 is a digital compass solution designed for use in navigation and precision pointing applications. Using a common set of commands from the legacy HMR3300 digital compass solution, the HMR3400 is designed to be easily integrated into host systems with a regulated 5 volt supply and a UART serial data interface.
Features: • Tilt-Compensated • Operating Temperature Range: -40°C ~ 85°C

Description	Digi-Key Part No.	Price Each	Honeywell Part No.
HMR3400 Module	342-1057-ND	360.00	HMR3400

TruePoint™ Compass Module

The HMR3500 TruePoint compass module is a 3-axis digital compass solution with a customizable coordinate system for mounting in any desired orientation. It has provisions for hard and soft-iron correction algorithms to handle magnetic distortion effects. In addition a World Magnetic Model feature is provided to automatically add declination angle corrections for reference to true north (geographical north). **Features:** • Tilt-Compensated • Operating Temperature Range: -40°C ~ 85°C • Supply Voltage Range: 5DC **Benefits:** • Better than 1° Nominal Heading Accuracy (1δ), 0.1° Resolution • ±89° Pitch and Roll, 360° Continuous Roll Capability

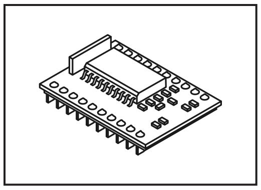
3-Axis Magnetic - Hybrid



A complete 3-axis magneto-meter with analog output in a 20-Pin hybrid DIP package.

Features:

• DIP-20 foot-print (1" x .75") allows easy insertion into system-level boards, reducing development costs • Solid state components improve reliability and ruggedness compared to mechanical fluxgates • Accurately measures fields from 40 µgauss to ±2 gauss at 1V/gauss • Low noise instrumentation amplifiers with 1kHz low pass filters, reject unwanted noise • No flux concentrators used in this design that can lead to hysteresis and non-repeatability • An externally accessible +2.5V reference improves measurement accuracy and stability • On-board excitation current source reduces temperature errors and regulates the power supply input • Magnetic field offsets or closed loop circuits can be applied using the built-in straps • Output signal accuracy may be enhanced by using the integral set/reset straps • All components selected and packaged in nonmagnetic material to reduce magnetic distortion and offsets.

Applications:

• Compassing • Navigation systems • Attitude reference • Traffic detection • Proximity detection • Medical devices

Specifications (Power Supply: +15VDC; Set/Reset switching is active):

• Operating Temperature: -40°C ~ 85°C, ambient @ 25°C • Supply Voltage: 6VDC ~ 15VDC; Transient protection circuitry should be added across V+ and Gnd if an unregulated power supply is used • Supply Current: 20mA • Output Voltage: 0.5V ~ 4.5V • Field Range: ±2 gauss • Typical Linearity Error: 1% FS; ±2 gauss applied field sweep • Typical Hysteresis Error: 0.05% FS; 3 sweeps across ±2 gauss • Typical Sensitivity: 1.0mV/V/gauss; at Vbridge +5V • Typical Resolution: 40 µgauss • Bandwidth: 1kHz

Units:

• 1 gauss (G) = 1 Oersted (in air), 1G = 79.58A/m, 1G = 10E-4 Tesla, 1G = 10E5 gamma

Description	Digi-Key Part No.	Price Each	Honeywell Part No.
3-Axis Magnet Sensor Hybrid	342-1011-ND	220.00	HMC2003

1, 2 and 3-Axis Magnetoresistive Digi-Reel®

Configured as a 4-element wheatstone bridge, these highly sensitive sensors convert magnetic fields to differential output voltages, capable of sensing magnetic fields as low as 30 µgauss.

Features: • Field range up to ±6 gauss, (earth's field = 0.5 gauss) • Small package designed for 1 and 2-axis to work together to provide 3-axis (x, y, z) sensing • Solid state devices reduce board assembly costs, improve reliability and ruggedness compared to mechanical fluxgates • Patented on-chip set/reset straps to reduce effects of temperature drift, non-linearity errors and loss of signal output due to the presence of high magnetic fields • Patented on-chip offset straps for elimination of the effects of hard iron distortion

Applications: • Compassing • Navigation systems • Attitude reference • Traffic detection • Medical devices • Non-contact switch

HMC6042

Digi-Reel® RoHS COMPLIANT

The HMC6042 includes our state of the art 1042 series magneto-resistive sensors plus a precision mixed signal ASIC containing three sensor amplifiers and a compatible set/reset strap driver circuit for 2.4V ~ 3.6V operation. The sensors feature precision in-axis sensitivity and linearity, solid-state construction with very low cross-axis sensitivity designed to measure both direction and magnitude of Earth's magnetic fields. **Features:** • Low Voltage Operations (2.4V ~ 3.6V) • Built-In Set/Reset Drive Circuit • Wide Magnetic Field Range (+/-6 Oe) **Benefits:** • Single Logic Input for Degaussing, Thermal Drift Compensation • Feedback Pins for Gain and Bandwidth Shaping

Digital Compass Modules

The Honeywell HMC5843 is a surface mount multi-chip module designed for low field magnetic sensing with a digital interface for applications such as low cost compassing and magnetometry. The HMC5843 includes our state of the art 1043 series magneto-resistive sensors plus Honeywell developed ASIC containing amplification, strap drivers, offset cancellation, 12-bit ADC and an I²C serial bus interface. **Features:** • 3-Axis Magnetoresistive Sensors and ASIC in a Single Package • Low Voltage Operations (2.4V ~ 3.3V) • I²C Digital Interface • Wide Magnetic Field Range (+/-6 Oe) **Benefits:** • Compatible for Battery Powered Applications • Complies with Current Environmental Standards
The HMC63xx digital compass modules combine a 2 or 3-axis tilt sensor with the required support circuitry for heading computation. By combining the sensor and processing elements into a small LCC or LPCC package designers will have the most simple solution to integrate low cost and space efficient compasses for mobile phones, consumer electronics, vehicle compassing and antenna positioning. **HMC6352 Features:** • 24 pin LCC • 2-axis sensor • 2.7V ~ 5.2V supply range **HMC6343 Features:** • 36 pin LPCC • 3-axis sensor • 2.7V ~ 3.6V supply range

DRM™ 4000

Features and Benefits: • State-of-the-art dead reckoning device for personnel navigation • Typical DR accuracy 2% distance traveled • Low power consumption • Industrial temperature range: -40°C ~ 85°C

The Dead Reckoning Module (DRM™) 4000 is a miniature, electronic device for personnel on foot that provides the user's position relative to an initialization point. When GPS data is available, the dead reckoning sensors are automatically calibrated continuously and the two data sources are blended into a composite real-time position data output. When GPS data is unavailable, dead reckoning takes over. Motion classification algorithms analyze walking motion, and compensate when the user is running, or in place.

Rugged Stainless Steel Pressure Transducers Featuring Microfused Technology

MSP Series:

The MSP pressure transducer is designed for high-volume, low-cost commercial, industrial and off road applications which require accurate measurement of gases or liquids. Operating ranges up to 10,000 psi is available with your choice of output signal in volts, millivolts, or milliamps. The MSP uses a micro machined silicon strain gauge inorganically bonded to a machined stainless steel diaphragm; no welds, no 0-rings, no silicone oil. All wetted surfaces are stainless steel and all signal conditioning electronics are housed in a stainless steel cover which provides protection from hostile environments. The housing is sealed and requires no maintenance. Each transducer is thoroughly tested and calibrated before shipment.

Applications:

• Pumps and Compressors • Hydraulic / Pneumatic Systems • Energy and Water Management • Pressure Instrumentation • Process Control, Off Road Refrigeration, HVAC.

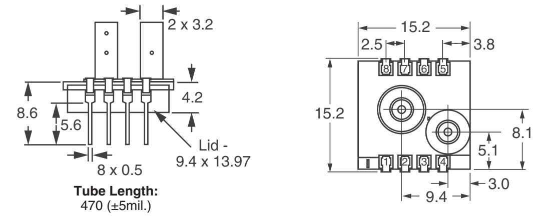
measurement SPECIALTIES

PC Board Mountable Pressure Sensors Temperature Compensated

These pressure sensors are intended for cost sensitive applications where excellent performance and long-term stability are required. Integral temperature compensation is provided using laser-trimmed resistors. An additional laser-trimmed resistor is included to normalize pressure sensitivity variations by programming the gain of an external differential amplifier. This provides sensitivity interchangeability of ±1%.
Features: • ±0.1% Non-linearity • ±1.0% Interchangeable Span (provided by gain set resistor) • Solid State Reliability • Low Power
Specifications: • **Output:** 0-100mV typical (full scale) • **Supply Current:** 1.5mA typical • **Response Time:** 1.0mSec typical (For a zero-to-full scale pressure step change) • **Operating Temperature:** -40°C ~ 125°C

Dimensions in mm



Tube Length:
470 (±5mil.)

Model 1210/1220 – Low Pressure:
- 0°C ~ 50°C Temperature Compensation Range • 1.0% Temperature Performance

Model 1230/1240 – UltraStable™:
- -20°C ~ 85°C Temperature Compensation Range • ±0.5% Temperature Performance

Model 1210/1220 – Medium Pressure:
- 0°C ~ 50°C Temperature Compensation Range • 0.5 ~ 1% Temperature Performance

Model 4425 and 4426
These pressure sensors are temperature compensated, piezoresistive silicon pressure sensors packaged in a dual-in-line configuration and intended for cost sensitive applications where excellent performance and long-term stability are required. **Features:** • Dual in-line package • Solid state reliability **Specifications:** • Output: 0 ~ 100mV • Supply voltage: 12V (typical) • Operating temperature range: -25°C ~ 85°C

PC Board Mountable Pressure Sensors

Model 1451
This pressure sensor is intended for high volume applications where small size, light weight, low cost, and compatibility with automated assembly equipment are required.
Features: • SMT Package • ±0.25% Pressure Non-linearity • 3 Pressure Port Options • Solid State Reliability • Low Power **Specifications:** • **Output:** 0 ~ 60mV • **Supply Voltage:** 3VDC • **Response Time:** 1.0mSec typical • **Operating Temperature:** -40°C ~ 125°C

SPECIALTIES

GCD-SE Series Gage Heads - Precision Spring-Loaded

Features: • CE compliance • Heavy-duty, all welded construction • Unipolar ranges: 0.1" ~ 2.0" • 8.5VDC ~ 28VDC operation • Low power consumption • May be battery operated • 0VDC ~ 5VDC and 1VDC ~ 6VDC outputs • New heavy duty front end • Hermetically sealed design

AccuStar® II Clinometer

AccuStar II combines the function of two clinometers in one package. The unique dome shaped design features a capacitance based sensor which produces output signals directly proportional to the relative tilt in two axis.
Features: • Two clinometers in one package • Adaptable design DC powered • Ratiometric and PW digital output in one model • Trimmable DC output

Description	Linear Range	Op. Temp. Range	Digi-Key Part No.	Price Each 1	10	25	Measurement Specialties Part No.
Dual Axis Clinometer	±20°	-20°C ~ 75°C	356-1034-ND	125.36	119.09	112.83	02119011-000

Rotary Variable Inductance Transducer (RVIT)

The R120LC is a DC operated noncontact rotary transducer.

Description	Full Range	Input Voltage	Output Voltage	Digi-Key Part No.	Price Each 1	5	20	Measurement Specialties Part No.
R120LC Transducer	±60°	4.75-5.25VDC	0.5-4.5VDC	356-1076-ND	147.23	134.96	122.69	02183000-000

AngleStar® Digital Protractor

The AngleStar Digital Protractor Model DP-45 provides instant digital display of level, angle and tilt.
Features: • Reads in degrees • Alternate reference (floating zero) • Display hold • High impact plastic carrying case

Description	Linear Range	Operating Temperature Range	Digi-Key Part No.	Price Each 1	5	20	Measurement Specialties Part No.
Digital Protractor Model DP-45	±45°	0°C ~ 65°C	356-1035-ND	368.85	347.37	313.95	02475-01

DC Powered Voltage Module

The LVM-110 Module is a DC-powered LVDT signal conditioner board consisting of a carrier oscillator, AC amplifier, demodulator, filter, and DC amplifier.

Features: • DC powered • Zero and span controls • Six jumper selectable gains • Plug-in, card edge, or stand-off installation • 2.5kHz, 5kHz or 10kHz excitation

Description	Operating Range	Power Range	Digi-Key Part No.	Price Each 1	5	10	Measurement Specialties Part No.

Dual Channel LVDT Readout/Controller

The Measurement Specialties microprocessor based LVDT indicator and set-point controller is designed for industrial and process control applications utilizing any LVDT/RVDT-based measurement device.

Features: • 1/4 DIN aluminum case • EL back-lit • LCD display • Standard 9-Pin RS-232 Connector

Description	Linear Range	Operating Temperature Range	Digi-Key Part No.	Price Each	Measurement Specialties Part No.
MP2000 Series	<±0.02%	0°C ~ 55°C	356-1075-ND	812.15	02291335-000

AccuStar® Electronic Clinometers

The AccuStar Electronic Clinometer is an extremely accurate angle measurement device. This compact and rugged sensor is ideal where space is critical and environmental conditions are serious design concerns.
Features: • CE certified • Just 2" in diameter • Rugged plastic housing • Extremely accurate • Weighs only 2 oz.

Description	Linear Range	Operating Temperature Range	Digi-Key Part No.	Price Each 1	10	25	Measurement Specialties Part No.
Single Axis Ratiometric Vertical Flange	±45°	-30°C ~ 65°C	356-1032-ND	151.95	139.93	127.91	02110002-000

Ares Series Pressure Transducers

The Ares Series is a small, low cost pressure transducer, which is able to measure pressures as low as 0 ~ 5, 0 ~ 10, 0 ~ 15 inches of water, and 0 ~ 1psig.
Features: • Very low pressure ranges • Small size • PCB mountable • Solder reflow capability • Barbed pressure ports

LM Series Pressure Sensors

The LM Series incorporates stainless steel and plastic isolation suitable for water, other fluid and gas.
Features: • Low pressure ranges • High level output • Small size • Plastic fitting

High Stability Stainless Steel Pressure Transducer

RoHS COMPLIANT

The UltraStable 300/600 from Measurement Specialties, incorporates an ultra-rugged IP 67 rated housing. All wetted parts are constructed of 316 (300 Series)/316L (600 Series) stainless steel, providing media isolation and no internal "O" rings.

Senstronics

Sensors with Temperature Output

Senstronics Storm Series is a unique product providing a lifetime of accuracy for combined pressure/temperature applications used in harsh media requiring stainless steel wetted parts. The 17-4PH stainless steel sensor design allows for a wide range of temperature and provides a rugged design that can withstand high levels of shock and vibration.

Specification: • 1/4 NPTF *Note: Mating harness included with each sensor.*

HUMIREL **measurement SPECIALTIES**

Sensors

The relative humidity sensors by Humirel are based on capacitive cell technology using a patented solid polymer structure. They are fully interchangeable with no calibration required in standard conditions. Suitable for linear voltage or frequency output circuitry. An NTC thermistor is used for temperature measurement.

The RH modules are based on the HS1101LF capacitive humidity sensor and are voltage output devices. The RH/Temperature modules include a NTC thermistor for temperature measurement and are voltage or frequency output.

Features:
- High reliability and long term stability
- Instantaneous de-saturation after long periods in saturation conditions
- Fast response times
- Patented solid polymer structure

Honeywell
Sensing and Control

Capacitive Humidity Sensors

Digi-Reel®

HCH-1000 Series humidity sensor is a capacitive polymer sensor designed for relative humidity measurement. **Features:** • Polymer sensing offers enhanced resistance against contamination • Enhanced sensitivity and accuracy, fast response **Operating Temperature Range:** -40°C ~ 120°C **Operating Humidity Range:** 0 ~ 100%

HIH-40xx and HIH-50xx Series humidity sensors are designed specifically for high volume OEM users. **Features:** • Molded thermoset plastic housing • Near linear voltage output vs. % RH **Operating Temperature Range:** -40°C ~ 85°C **Operating Humidity Range:** 0 ~ 100%

HIH-4602 Series relative humidity sensors combine both relative humidity and temperature sensing in a TO-5 housing with a hydrophobic sintered stainless steel filter. **Features:** • Near linear voltage output vs % RH • Chemically resistant • Built-in static protection • TO-5 housing

TDK CHS Series Humidity Sensors

Dim. in mm

TDK's CHS Series humidity sensors are compact and extremely simple to apply. Because they contain the necessary circuitry, there is no need to provide additional control circuitry or perform time-consuming calibration. With simple connection to a power supply, they will output DC at 100% relative humidity. This makes it possible to read RH directly with a voltmeter.

Ultrasonic Nebulizer Units

The TDK ultrasonic humidifier unit was the first such product in the world to be developed. In addition to such home uses, these ultrasonic humidifier units have numerous advantages for humidification of vegetable showcases, preservation and growth of agricultural products, industrial applications, etc.

NB-59S-09S-0:

- Compact with highly reliable circuitry
- Separate transducer and drive circuit sections provide superior layout versatility

NB-80E-01-H:

- Compact with highly reliable circuitry
- Separate transducer and drive circuit sections provide superior layout versatility
- Because the ultrasonic frequencies used are higher than with typical household-type units, mist particle size is extremely fine. This unit is thus ideal for products intended for smaller spaces

EPCOS

NEW! Pressure Sensors

These transmitters are based on piezoresistive silicon pressure sensors from Epcos' own clean room. This series electronically compensates nonlinearity and temperature errors and supplies a precise calibrated output signal with a high immunity against EMI.

Features: • Piezoresistive MEMS technology • Measured media (gauge pressure): Air and non-aggressive gases (0~100% r.h.) and non-aggressive fluids

Specifications: Operating Temperature Range: -25°C ~ 85°C

VISHAY. BCcomponents

Capacitive Humidity Sensor

The capacitive atmospheric humidity sensor consists of a non-conductive foil, which is covered on both sides with a layer of gold. The dielectric constant of the foil changes as a function of the relative humidity of the ambient atmosphere, and accordingly, the capacitance value of the sensor is a measure for relative humidity.

OMRON® Capacitive Proximity Sensors

Features:
Capacitive sensors operate similar to Inductive sensors except that a plate is used instead of a coil in the sensor's head. This plate develops a capacitive field between the sensor and ground. When an object comes within sensing distance of the sensor, the capacitive field changes which gets detected by the sensor and turns on the output. Perfect for detecting both metallic and non-metallic objects such as glass, wood, water, oils and plastics. Also works well for detecting liquids and solids in containers.

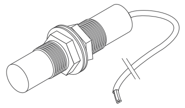
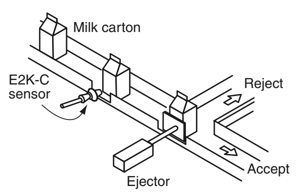
Threaded Body Style:





Photoelectric Sensors

Through Beam

Reflective/Diffuse

Features: Photoelectric sensors consist of a light source and detector for object detection. **Through-beam** sensors use a separate transmitter and receiver, which an object must pass between to block the light. **Retroflective** sensors is a combined transmitter/receiver in one body and is reflected. A reflector typically is used to return the beam from the transmitter back to the receiver. Once an object is moved between the reflector and emitter/detector, the receiver output turns on. **Diffuse** reflective is a combined transmitter/receiver in one body. Objects are detected by moving an object closer to the sensor directly from the front, rather than from the side. Once an object has come within the sensing distance, the amount of reflected light is sufficient to trigger the receiver output.

- **XN2** connectors are easy connect (e-CON) connectors with spring loaded terminals for industrial applications and fast wire termination.
- **XS5** connectors feature an 1/8 turn smart click connection that is fully IP67 sealed. Offered in both single and double ended styles.

Optical Fiber Optic Amplifiers

Features: Omron's E3X-NH/E3X-NA series of high performance Fiber Optic Amplifiers contain true 16 Bit processor which allows a very fine tuning sensitivity feature. Three separate teach modes for hassle free setup for different applications. Ideal for detecting very small objects or fine wires.

The E3X series feature high performance, fast switching response times. Set-mode blinking output aids in alignment. Sensing distances vary with the type of fiber used.

Operation Indicator (orange)
Lit when output is ON.

Incident Level Indicators
(green, 8 levels)
Lit depending on the incident light amount.

UP/DOWN Selector
Select UP for increasing the threshold value.
Select Down for decreasing the threshold value.

Operation Mode Selector
Switchable between light-ON and dark-ON modes.

Threshold Indicators
(red, 13 levels)
Indicates threshold level.

SET Button
For teaching or for fine threshold adjustment.

Mode Selector
Switchable among TEACH, ADJ, and RUN modes.

OMRON

Fiber Cables for E3X Amplifiers

Fig. 1

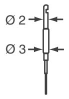

Fig. 2

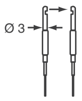
Fig. 3

Fig. 4



Pre-made fiber optic cables that enable very confined mounting spaces and very fast target detection. Use **Through-beam** for long distance detection where the transmit and receive cable are separated. Use **Concentric Beam** for depth detection or changing target distances where eliminating background objects is required. Periscope sensing heads (Side Beam) save space in right angle detecting. Most fiber cables offer IP67 protection and temperature ratings of -40°C ~ 70°C.

ATMEL

QTouch™

QProx™/QTouch™ Charge-Transfer ("QT") General Description: These are self-contained digital capacitance ICs capable of detecting proximity, touch, and fluid level. With appropriate electrodes they can sense through sealed surfaces made of glass, plastic, stone, ceramic, and wood, up to thicknesses of several inches. This capability coupled with an ability to continuously calibrate leads to new product concepts. They are designed specifically for control panels in home appliances, PC peripherals, machinery, security systems, lighting controls, or anywhere a mechanical switch or button may be found. Versions also available for fluid sensing.

MEMS Accelerometers

ST offers a portfolio of MEMS-based sensors able to sense acceleration in two or three axis. The mechanical part of linear accelerometer sensor is based on a silicon inter-digitated structure done by fixed and movable fingers. To sense the acceleration in each axis, these structures are packaged in orthogonally groups and the acceleration in each direction is sensed by measuring the change of capacitance between fixed and movable elements correlated to that axis. The changing of capacitance per axis is then translated into an analog or digital output signal in the interface chip. The whole process of design and production of sensors is managed by STMicroelectronics. This guarantees to the customer high volume production, long term security, high precision and reliability since all the devices are tested by Standards and Proprietary Test Systems.

Tools and Evaluation Boards

The Micro Electro Mechanical System is a new technology that exploits the mechanical properties of silicon to integrate mechanical structures sensitive to vibration, displacement, acceleration and rotation. This new technology opened the door to a new generation of compact, cost effective and sensitive sensors. While conventional microelectronics development focuses on incremental improvements of a well-established technology, MEMS challenge the way designers work, compelling them to think three dimensionally and to acquire a unique blend of multi-disciplinary skills combining electrical, semiconductor and mechanical design.

Features:

• Strategic Cost • Low Power Consumption • Low size and weight • High volumes • High reproducibility • High thermal stability by design • High integration with standard IC devices to build Multi Chip Modules (MCM) or smart sensors.

LIS302DL Evaluation Boards

MEMS 3-Axis ±2g/±8g. Digital Output Low Power Linear Accelerometer Evaluation Boards based on LIS302DL (EK302DL).

497-6229-ND (STEVAL-MKI006V1)........ **$66.15**
497-6342-ND (STEVAL-MKI013V1)........ **$40.95**

LIS3LV02DQ Evaluation Board

MEMS 3-Axis ±2g/±6g. Digital Output Low Voltage Linear Accelerometer Evaluation Board based on LIS3LV02DQ.

497-6249-ND (STEVAL-MKI004V1)........ **$66.15**

LIS3LV02DL Evaluation Board

MEMS 3-Axis ±2g/±6g. Digital Output Low Voltage Linear Accelerometer. Evaluation Board based on LIS3LV02DL (EK3LV02DL).

497-6226-ND (STEVAL-MKI005V1)........ **$66.15**

LIS331AL Evaluation Board

The STEVEL-MKI021V1 MEMS 3-Axis 2g Analog Output Evaluation Board based on NANO Accelerometer LIS331AL.

497-8205-ND (STEVAL-MKI021V1)........ **$58.28**

NEW! STEVAL-MKI033V1 Evaluation Board

The STEVAL-MKI033V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for demonstration of the LPR503AL product family. The STEVAL-MKI033V1 demo board has been designed for use in two different working modes; Analog working mode: the microcontroller on the board is disabled and the analog outputs of the device are available to the user on a dedicated connector. This is the default working mode when the power supply is applied either through the USB connector or through the supply connector. Digital working mode: the microcontroller on the board is enabled and it allows the user to digitally acquire the output signals of the device, to see them on the PC through the dedicated GUI, and to control the control pins of the device.

497-10367-ND (STEVAL-MKI033V1)........ **$106.13**

NEW! STEVAL-MKI034V1 Evaluation Board

The STEVAL-MKI034V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for demonstration of the LPR510AL product family. The STEVAL-MKI034V1 demo board has been designed for use in two different working modes; Analog working mode: the microcontroller on the board is disabled and the analog outputs of the device are available to the user on a dedicated connector. This is the default working mode when the power supply is applied either through the USB connector or through the supply connector. Digital working mode: the microcontroller on the board is enabled and it allows the user to digitally acquire the output signals of the device, to see them on the PC through the dedicated GUI, and to control the control pins of the device.

497-10366-ND (STEVAL-MKI034V1)........ **$101.08**

NEW! STEVAL-MKI035V1 Evaluation Board

MEMS analog output demonstration board for the LPR530AL, ±300/s and ±1200/s, dual-axis pitch and roll gyroscope.

497-9088-ND (STEVAL-MKI035V1)........ **$106.13**

NEW! STEVAL-MKI037V1 Evaluation Board

The STEVAL-MKI037V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for demonstration of the LPY530AL product family. The STEVAL-MKI037V1 demo board has been designed for use in two different working modes; Analog working mode: the microcontroller on the board is disabled and the analog outputs of the device are available to the user on a dedicated connector. This is the default working mode when the power supply is applied either through the USB connector or through the supply connector. Digital working mode: the microcontroller on the board is enabled and it allows the user to digitally acquire the output signals of the device, to see them on the PC through the dedicated GUI, and to control the control pins of the device.

497-10365-ND (STEVAL-MKI037V1)........ **$106.13**

NEW! STEVAL-MKI038V1 Evaluation Board

Acceleration Modules and Development Tools STM8S207R6 BRD LIS331DLH MEMS.

497-10046-ND (STEVAL-MKI038V1)........ **$106.13**

NEW! STEVAL-MKI042V1 Evaluation Board

The STEVAL-MKI042V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LPR503AL pinout and comes ready-to-use with the required decoupling capacitors on the VDD power supply line.

497-10364-ND (STEVAL-MKI042V1)........ **$39.38**

NEW! STEVAL-MKI043V1 Evaluation Board

The STEVAL-MKI043V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LPR510AL pinout and comes ready-to-use with the required decoupling capacitors on the VDD power supply line.

497-10363-ND (STEVAL-MKI043V1)........ **$39.38**

NEW! STEVAL-MKI044V1 Evaluation Board

Acceleration Modules and Development Tools LPR530AL Dual-Axis DIL24 Adapter Board.

497-9089-ND (STEVAL-MKI044V1)........ **$33.08**

NEW! STEVAL-MKI045V1 Evaluation Board

The STEVAL-MKI045V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LPY503AL pinout and comes ready-to-use with the required decoupling capacitors on the VDD power supply line.

497-10362-ND (STEVAL-MKI045V1)........ **$39.38**

NEW! STEVAL-MKI047V1 Evaluation Board

Acceleration Modules and Development Tools LPR550AL Dual-Axis GYRO Sensor Board.

497-10047-ND (STEVAL-MKI047V1)........ **$33.08**

NEW! STEVAL-MKI050V1 Evaluation Board

Acceleration Modules and Development Tools LPR530AL Adapter BRD Plug into DIL 20.

497-9090-ND (STEVAL-MKI050V1)........ **$33.08**

NEW! STEVAL-MKI062V1 Evaluation Board

iNEMO™: inertial module demonstration board based on MEMS and STM32. The STEVAL-MKI062V1 (iNEMO) is a unique platform designed to demonstrate the performance of ST's most advanced inertial, temperature and pressure sensors. It provides a complete set of inertial measurements from an accelerometer, magnetometer and gyroscopes, as well as data from pressure and temperature sensors to measure environmental conditions. iNEMO, a 9 DOF (degrees of freedom) inertial system to sense motion using a combination of sensors, represents a complete hardware platform for a variety of application including virtual reality, augmented reality, platform stabilization, human machine interfaces and robotics. To aid in user development and analysis, the STEVAL-MKI062V1 demonstration kit includes a PC GUI for sensor output display and a firmware library to facilitate the use of the demonstration board features. A complete set of communication interfaces (USB, wireless, COM), small 4.5cm x 5cm size, and several power supply options make iNEMO a flexible, open evaluation platform.

497-10048-ND (STEVAL-MKI062V1)........ **$262.50**

NEW! STEVAL-MKI062V2 Evaluation Board

The STEVAL-MKI062V2 is the second generation of the iNEMO™ module family. It combines accelerometers, gyroscopes and magnetometers with pressure and temperature sensors to provide 3-axis sensing of linear, angular and magnetic motion, complemented with temperature and barometer/altitude readings, representing the new ST 10-DOF (degrees of freedom) platform. Based on the pervious version, the STEVAL-MKI062V2 represents another step forward in miniaturization, integrating five ST sensors: a 2-axis roll-and-pitch gyroscope, a 1-axis yaw gyroscope, a 6-axis geomagnetic module, a pressure sensor and a temperature sensor.

497-10508-ND (STEVAL-MKI062V2)........ **$262.50**

NEW! STEVAL-MKI089V1 Evaluation Board

The STEVAL-MKI089V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LIS331DLH pinout and comes ready-to-use with the required decoupling capacitors on the VDD power supply line.

497-10493-ND (STEVAL-MKI089V1)........ **$33.08**

NEW! STEVAL-MKI090V1 Evaluation Board

The STEVAL-MKI090V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LIS331DLF pinout and comes ready-to-use with the required decoupling capacitors on the VDD power supply line.

497-10492-ND (STEVAL-MKI090V1)........ **$33.08**

NEW! STEVAL-MKI091V1 Evaluation Board

The STEVAL-MKI091V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LIS331DLM pinout and comes ready-to-use with the required decoupling capacitors on the VDD power supply line.

497-10491-ND (STEVAL-MKI091V1)........ **$33.08**

(Continued)

NEW! STM8L1526-EVAL Evaluation Board

The STM8L1526-EVAL evaluation board is a complete demonstration and development platform for STMicroelectronic's STM8 core-based STM8L152C6 microcontroller which supports I2C, SPI, USART, 12-bit ADC, 12-bit DAC, LCD driver, 2KB internal SRAM, 32KB EEPROM and SWIM debugging. The full range of hardware features on the board helps you evaluate all peripherals (motor control, USART, audio DAC, LCD, IR LED, IrDA, SPI Flash, MicroSD Card, temperature sensor and EEPROM… etc.) and develop your own applications. Extension headers facilitate easy connection of a daughterboard or wrapping board for specific applications. An ST-LINK is integrated on the board as the embedded in-circuit debugger and programmer for the STM8 MCU.

497-10590-ND (STM8L1526-EVAL)........ **$198.75**

STEVAL-IFS012V9 Demonstration Board

Multi device temperature sensor demonstrator based on ST72F65x. Demonstration board features: Evaluation system to demonstrate features of ST's new temperature sensor (digital and analog) family, in standalone mode and USB interfaced Graphical User Interface (GUI) mode.
Features: • Measures and displays temperature • I2C / SMBus / SPI/ADC communication compatible • Displays RTC time and date and its featured through GUI • Easy to use GUI, interfaced through USB. GUI can be used to configure the sensors and RTC • Temperature monitoring, storing in NAND and plotting on graph is supported

497-8923-ND (STEVAL-IFS012V9) Card for 8-TSSOP Package **$28.35**

LIS344ALH Demonstration Kit

The STEVAL-MKI014V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for the evaluation of the LIS344ALH.

497-8231-ND (STEVAL-MKI014V1)........ **$61.43**

LIS344AL Demonstration Kit

The STEVAL-MKI016V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for the evaluation of the LIS344AL.
The LIS344AL is a low-power 3-axis linear capacitive accelerometer that includes a sensing element and an IC interface capable of taking information from the sensing element and providing an analog signal to an external application.

497-8200-ND (STEVAL-MKI016V1)........ **$61.43**

LIS302SG Demonstration Kit

The STEVAL-MKI019V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for the evaluation of the LIS302SG.
The LIS302SG is a low-power 3-axis linear capacitive accelerometer that includes a sensing element and an IC interface capable of taking information from the sensing element and providing and analog signal to an external application.

497-8203-ND (STEVAL-MKI019V1)........ **$61.43**

LIS331DL Demonstration Kit

The STEVAL-MKI024V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for demonstration of the LIS331DL. The LIS331DL is a low-power 3-axis linear accelerometer with digital output. The device includes a sensing element and an IC interface capable of translating information from the sensing element into a measured signal that can be used for external applications. In addition to the MEMS sensor, the demonstration board utilizes an ST7-USB microcontroller which functions as a bridge between the sensor and the PC, on which it is possible to use the graphical user interface downloadable to the website or dedicated software routines for customized applications.

497-8719-ND (STEVAL-MKI024V1)........ **$82.39**

LISY300AL Demonstration Kit

The LISY300AL is a low-power single-axis yaw rate gyroscope. It includes a sensing element and an IC interface able to provide the measured angular rate to the external world through an analog output voltage.

497-8504-ND (STEVAL-MKI023V1)........ **$59.85**

NEW! STEVAL-MKI022V1 Demonstration Kit

The STEVAL-MKI022V1 is a demonstration kit designed to provide the user with a complete, ready-to-use platform for demonstration of the LIS331DLH. The LIS331DLH is a low-power 3-axis linear accelerometer with digital output. The device includes a sensing element and an IC interface capable of translating information from the sensing element into a measured signal that can be used for external applications.

497-9053-ND (STEVAL-MKI022V1)........ **$82.39**

Adapter Boards

497-6227-ND	(STEVAL-MKI009V1)	LIS3LV02DL Adapter Board DIL 20 socket........	**$29.93**
497-8199-ND	(STEVAL-MKI015V1)	Adapter Board for the LIS344ALH	**$40.95**
497-8201-ND	(STEVAL-MKI017V1)	Adapter Board for the LIS344AL........	**$40.95**
497-8202-ND	(STEVAL-MKI018V1)	Adapter Board for the LIS244AL........	**$40.95**
497-8204-ND	(STEVAL-MKI020V1)	Adapter Board for the LIS302SG	**$40.95**

---

*i*MEMS® Accelerometers and Gyroscopes

As a MEMS pioneer, Analog Devices has held a leadership position as a large volume supplier of integrated MEMS accelerometers and gyroscopes. The ADXL products are the foundation for Analog Devices accelerometer family. Available in low-g or high-g sensing ranges iMEMS (Integrated Micro Electro Mechanical System) accelerometers are used to measure position, motion, tilt, shock, and vibration in a broad array of applications. Analog Devices offer a broad accelerometer portfolio, including high performance, low power consumption and small size.

NEW! *i*MEMS® Omnidirectional Microphones

Digi-Reel® RoHS COMPLIANT

The ADMP421 is a low cost, low power, digital output bottom ported omnidirectional MEMS microphone. The ADMP421 consists of a MEMS microphone element, an impedance converter amplifier, and a fourth-order Σ-Δ modulator. The digital interface allows for the pulse density modulated (PDM) output of two microphones to be time multiplexed on a single data line using a single clock.

The ADMP401 is a high quality, low cost, low power, analog output bottom ported omnidirectional MEMS microphone. The ADMP401 consists of a MEMS microphone element and an impedance converter amplifier.

ANALOG DEVICES *i*Sensor™ Intelligent Sensors

RoHS COMPLIANT

*i*Sensor ADIS Accelerometers/Gyros enhance ADXL/ADXRS iMEMS accelerometers with additional performance and functionality, such as embedded signal processing and control. These inertial sensors address special requirements such as calibration/tuning, application specific interfaces, digital I/O, wireless links, embedded intelligence and programmability, power management, and analog signal conditioning.

Digi-Reel® Most SMT cutdown parts are available on a **Digi-Reel®**. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See **Digi-Key®** Services on page 2 for additional information.

ACH-01 Accelerometers

The ACH-01 Accelerometer is a robust, general purpose, linear single axis accelerometer featuring buffered electronic output.

Specifications: • Sensitivity: 10mV/g • Lower Frequency Limit (-3dB): 2Hz • Upper Frequency Limit (+3dB): 20kHz • Dynamic Range: ±150g • Linearity: 0.1% • Resonant Frequency: 35kHz • Operating Temperature: -40°C ~ 85°C • Maximum Shock Level: 1000g

Basic Design Kit

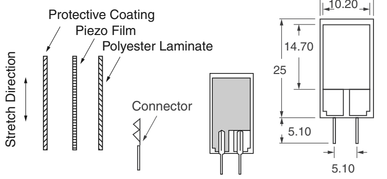
This kit demonstrates the use of MSI piezo film sensors as microphones, speakers, switches and acoustic pickups. All components and film samples in the kit can be used for experimentation.
Kit Includes: • Seven sensor elements • One piezo cable • One PCB for ACH-04-08 • Application/instruction specifications • Technical manual

Description	Digi-Key Part No.	Price Each	Measurement Specialties Part No.
Basic Design Kit	MSP1010-ND	200.00	0-1004308-0

LDT Vibration Sensors

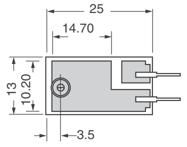
Typically, a 0.005" (125μm) polyester layer is laminated to a 28μm piezo film element. When used in a "bending" mode, laminated film elements develop much higher voltage output when flexed than non-laminated elements. The piezo film is off the neutral axis in the laminate, and is strained more when flexed.

LDT0-028K High Sensitivity



LDTM

Dimensions in mm



Also available with a mass (M) which provides higher output (mv/g) for higher sensitivity applications.

MiniSense

Pressure Sensors

The SCP1000 performs almost complete data processing on-chip. The communication between the SCP1000 and its host micro-controller (μC) is based on a serial interface, an interrupt line and specialized pins used to trigger special functions. Two different serial interfaces are available: SPI and TWI (TWI is very similar to I²C bus). The appropriate communication interface is pre-programmed in the factory.
The SCP1000 pressure demonstrator is designed to give a quick access and understanding on the performance and capabilities of the SCP1000 pressure component. The demo kit supports SCP1000-D01 and SCP1000-D11 sensors.
SCP1000 Demo Kit Includes: SCP1000-D01 sensor soldered on chip carrier PCB, USB interface card inside the demo box, USB cable, CD-ROM with documentation, drivers and GUI software running on PC

VTI Technologies is a forerunner in motion and pressure sensors and the world's leading designer and producer of acceleration sensors.

VTI develops and produces silicon based capacitive sensors with unique 3D-MEMS (MicroElectroMechanical System) technology, with application areas in acceleration, inclination, shock, vibration and pressure measurement.

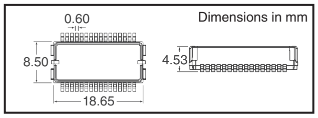
NEW! Combined Gyroscope and 3-Axis Accelerometer



Description: • A combined high performance gyroscope and accelerometer component. The sensor is based on VTI's proven capacitive 3D-MEMS technology. The housing is suitable for SMD mounting and the component is compatible with ROHS and ELV directives. **Features:** • SCC1300-D02: ±100°/s angular rate measurement range; SCC1300-D04: ±300°/s angular rate measurement range • Angular rate measurement around X axis • Digital SPI interfacing **Applications:** • Inertial Measurement Units (IMUs) for highly demanding environments • Roll over detection • Robotic control systems • Guidance systems

Bosch Sensortec BOSCH

Acceleration and Pressure Sensors

BMA020/BMA150: The BMA020/BMA150 is a triaxial, digital low-g acceleration sensor with digital interfaces, aiming for low-power consumer market applications. **Features:** • Switchable g-range and bandwidth • Low-power consumption

BMA140/BMA145: The BMA140/145 is an analog, triaxial low-g acceleration sensor for consumer market applications, available in a super-flat land grid array (LGA) package with a very small footprint and height of merely 0.9mm. **Features:** • Triaxial, analog low-g sensor with three parallel outputs • ±4g range • Ultra low power consumption • Very wide power supply range • Internal filtering capability

BMD040: The BMD040 analog output, absolute pressure sensor comprises a piezo-resistive 3MPa pressure sensor element and a circuitry for signal amplification and temperature compensation. **Features:** • High precision barometric pressure sensor • TO-8 metal can package • Fully calibrated • Temperature compensated • ESD-protection and short circuit protected

BMP085: The BMP085 is a high-precision, ultra-low power barometric pressure sensor for use in advanced mobile applications. **Features:** • Wide barometric pressure range • Flexible supply voltage range • Ultra-low power consumption • Fully calibrated • Small, flat package

SMD085: The SMD085 is a high precision barometric pressure sensor. It consists of an integrated sensing element, a logic control unit, a temperature compensation circuit, as well as an offset compensation circuit. **Features:** • Temperature compensated • Fast ratiometric analog output • On chip fully calibrated transfer function

BMA120: The BMA120 is a triaxial, low-g acceleration sensor with digital interfaces, aiming for low-power consumer market applications. The BMA120 senses tilt, motion, shock and vibration in cell phones, handhelds, computer peripherals, man-machine interfaces, virtual reality features and game controllers.

BMA220: The BMA220 allows measurement of accelerations in 3 perpendicular axes and thus senses tilt, motion, shock and vibration in cell phones, handhelds, computer peripherals, man-machine interfaces, virtual reality features and game controllers.

Discrete NTC Thermistors

Bead Thermistors: Features: • Relatively uniform size • Offer ultra-fast time response • Highly sensitive to electric power **Specifications:** • Operating Temperature Range: -60°C ~ 300°C • Encapsulation: Glass hermetic seal • Lead Material: Platinum iridium • Dissipation constant (DC): 0.1 mW/°C (in still air) minimum • Time constant: 1s (in still air) maximum

Glass Probe Thermistors: Features: • Operating Temperature Range: -60°C ~ 300°C • Encapsulation: Glass • Lead Material: Dumet (copper clad Ni-Fe wire) • Dissipation constant (DC): Standard: 1.0 mW/°C in still air minimum, Mini: 0.7 mW/°C (in still air) minimum • Time constant: Standard: 22s (in still air) maximum, Mini: 10s (in still air) maximum

Glass Encapsulated Chip Thermistors: Features: • High quality line of low cost hermetically sealed, glass-encapsulated units • Evolved from highly successful and field proven Honeywell Standard Chip Series • DO-35 package

Uni-Curve® Series: Features: • High quality, low cost resistance temperature matched interchangeable thermistors • Accuracy • High stability • Epoxy coated

Disc Thermistors: Features: • Ideally suited for low cost applications with a maximum temperature of 150°C • PC Board mountable • Solderable leads • Tinned copper leads

TDK

Surface Mount NTC Thermistors

NTC (Negative Temperature Coefficient) Thermistors are manufactured from sintered metal oxides. TDK thermistors have low thermal time constraints, which result in extremely high rates of resistance change to accurately track the temperature.

Features:

- Layered internal electrode structure
- Good stability of resistance value after soldering

Axial Leaded Glass NTC Thermistors

Features:

- The NTCDS Series features a glass-sealed construction identical to that of DHDs (Double Heatsink Diodes).
- Tight tolerances are maintained in resistance vs. temperature characteristics.
- The application of semiconductor mass production techniques has resulted in considerable size reduction and improved consistency.

SMD NTC Thermistors

Features: • Excellent solderability and high stability in environment • Long time aging stability • High accuracy in resistance and B-constant • Reflow soldering possible • Lead is not contained in the product • Operating Temperature Range -40°C ~ 125°C • **Free Thermistor design tool - "Output Voltage Simulator" is available at http://murata.com/designlib/index.html**

N

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

NTC Thermistors

CWF Precision NTC Thermistor Probes **Features:** • Small size and fast response, temperature coefficient of resistance can reach- (2% ~ 5%/°C) • Long-term stability and reliability (yearly drift of ≤1%) • Excellent tolerance and interchangeability (the accuracy of R and B value can be ±1%) • Double layer packaging provides excellent insulation and high strength and impact resistance • Time Constant of ≤15S ~ 70S

MF11 NTC Thermistor **Features:** • Broad range of resistance • Standard tolerances: ±5% and ±10% • Measuring power ≤0.5mW • Dissipation Constant ≥6.0mW/°C • Time Constant of ≤30 seconds • Rated Power: 0.5W • Good level of tolerance and interchangeability

MF51 Precision Glass Encapsulated NTC Thermistor **Benefits:** • High precision • Fast response • Reliable stability • No aging effect • Improved moisture resistance

MF52 NTC Thermistor **Features:** • Small Size and fast response • Long-term Stability and Reliability • Excellent tolerance and interchangeability • Time Constant of ≤7 seconds in still air • UL Listed E240991

MF58 Glass Shell Precision NTC Thermistors **Features:** • Usable in high temperature and high moisture environments • Suitable for automatic insertion on thru-hole PCBs • Rapid response • High Sensitivity • Dissipation factor: ≥2mW/°C (in still air) • Operating temperature range: -55°C ~ 200°C • Rated power: ≤50mW

MF72 Power NTC Thermistors **Features:** • Small size and fast response • High power handling capability • Fast response to surge current • High material constant (B value) • Low residual resistance • Long-term Stability and Reliability • UL 1434 Listed E241319

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

U.S. SENSOR Thermistors

Precision Thermistor

U.S. Sensor's standard precision interchangeable thermistors are low cost, highly accurate, stable devices designed specifically for temperature sensing and control applications. They are particularly suited for uses where their precision interchangeability eliminates the necessity for costly individual circuit calibration.

Power Thermistors

U.S. Sensor's inrush current limiting power thermistors are specially formulated and processed NTC thermistors suitable for suppressing high inrush currents in switching power supplies and other applications where the high initial starting currents are undesirable.

AMETHERM NTC Thermistors

Circuit Protection Thermistors

Ametherm's NT Series Thermistors are rugged and reliable over a wide temperature range, and are built using high temperature material for long life and durability. The PANE and PANR series Thermistor Probes are designed for use in environments that are not as harsh as those that require a housing.

Lead Specifications: • Wire AWG: 28AWG tinned copper (Cu)
Electrical Specifications: • Resistance @ 25°C: 10000Ω ±10% • Beta: 3950°K ±2% • Curve: L • Dissipation Constant: 3.0mW/°C • Time Constant: 6 seconds • Operating Temperature: -50°C ~ 150°C

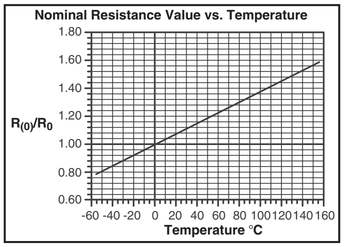
PTS Series Platinum SMD Flat Chip Temperature Sensors



PTS SMD Flat Chip Temperature Sensors are the perfect choice for temperature control of electronics operating under varying environmental conditions. The highly controlled platinum thin film manufacturing process guarantees an outstanding stability of temperature characteristics which ensures reliable operation even under harsh conditions. **Applications:** • Automotive electronics • Aviation electronics • Industrial electronics **Specifications:** • Temperature Coefficient (0°C ~ 100°C): 3850ppm/K • Temperature Range: -55°C ~ 155°C • Insulation Resistance: >10MΩ • Tolerance Class: B

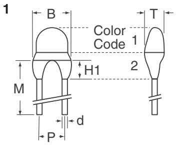

Fig. 2

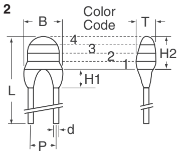

Surface Mount NTC Chip Thermistors

Surface Mount NTC Chip Thermistors have a negative temperature coefficient. The device has no marking. **Terminations:** • 0402 and 0603: NiSn • 0805: Ni **Applications:** • Temperature compensation, sensing and protection in: battery chargers, consumer equipment, and office equipment **Features:** • High accuracy over wide ranges of operating temperature (-40°C ~ 150°C) • Suitable for wave or reflow soldering • High sensitivity • Taped on reel

◆ ***RoHS Compliant*** † For Tape and Reel part number change CT-ND to TR-ND.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

VISHAY Dale

NTHS Series Surface Mount NTC Chip Thermistors

Features: • Solderable terminations • Wraparound terminations • Allows design flexibility for use with hybrid circuitry • High density monolithic construction

M, C, T Series Leaded Conformally Coated NTC Thermistors

M, C and T series are conformally coated, leaded thermistors for standard PC board mounting or assembly in probes. The coating is baked-on phenolic for durability and long-term stability. M and C series have tinned solid copper leads. The T series has solid nickel wires with Teflon® insulation to provide isolation when assembled in metal probes or housings. **Features:** • Small size, conformally coated • Wide resistance range • Available in multiple R-T curves **Specifications:** • Dissipation Constant: 2~3mWatts/°C • Thermal Time Constant: 6 ~ 14 seconds

NTC Thermistors
with Wire Leads

RoHS COMPLIANT

Features:
- Fast response
- High measuring accuracy
- Epoxy resin encapsulation
- PTFE-insulated leads
- UL approval (E69802)

Applications:
- Heating systems
- Industrial electronics
- Automotive electronics

Specifications:
- Climatic category: 55/155/56
- Maximum power: 60mW

Dimensions in mm

B57164K Series:

Features: • Lacquer-coated thermistor disk• Tinned copper leads
Applications: • Temperature measurement and compensation
Specifications: • Climatic category: 55/155/21 • Maximum power: 450mW

B57871S Series:

Features: • High measuring accuracy • Cost effective • Rugged design • Epoxy resin encapsulation • Tinned copper leads
Applications: • Temperature measurement
Specifications: • Climatic category: 55/155/56 • Maximum power: 60mW

B57885S Series:

Features: • High measuring accuracy • Cost effective • Rugged design • Epoxy resin encapsulation • Tinned copper leads
Applications: • Temperature measurement and compensation
Specifications: • Climatic category: 55/155/56 • Maximum power: 100mW

B57891M Series:

Features: • Wide resistance range • Cost effective • Lacquer coated thermistor disk • Leads are tinned copper-clad Fe wire
Applications: • Temperature compensation • Temperature measurement • Temperature control
Specifications: • Climatic category: 40/125/56 • Maximum power: 200mW

B57891S Series:

Features: • Wide resistance range • Cost effective • Lacquer coated thermistor disk • Leads are tinned copper-clad Fe wire
Applications: • Temperature compensation • Temperature measurement • Temperature control
Specifications: • Climatic category: 55/155/56 • Maximum power: 200mW

Surface Mount NTC Thermistors

For Temperature Measurement

Features:
- Inner electrodes • Excellent long-term aging stability in high-temperature and high humidity environments
- Super resistance stability during soldering (change ≤1%)

Applications:
- Temperature measurement and compensation in mobile phone applications (battery pack, TCXO, LCD)
- Data systems • Automotive electronics

Specifications:
- Climatic category: 55/125/56 • Maximum power: 150mW (0402); 180mW (0603); 210mW (0805)
- Resistance Tolerance: ±5%

NTC Thermistor Probes

B57020

Features: • Thermistor in molded plastic case • PVC insulated white connecting cable, UL approval (E252167)
Applications: • Cabinet and evaporator in refrigerators and deep freezers
Specifications: • Climatic category: 40/80/56 • Maximum power: 350mW

B57045

Features: • Cost effective • Good thermal coupling through screw type case (thread M3) • Electrically isolated aluminum case • Tinned copper leads
Applications: • Temperature compensation, measurement and control (chassis mounting)
Specifications: • Climatic category: 55/125/56 • Maximum power: 450mW • Test voltage: 2500VAC

B57500K

Features: • Copper case • Twin cable (black) • PVC Insulated wires with tinned ends, Tmax. = 105°C
Applications: • Evaporator sensor for air conditioning systems • Heating systems
Specifications: • Climatic category: 30/100/56 • Maximum power: 60mW • Test voltage: 1.5kVAC

B57500M

Features: • Epoxy resin encapsulation • PVC insulated black wire with tinned ends 26AWG
Applications: • Air sensor for air conditioning (NOT FOR USE IN EVAPORATOR)
Specifications: • Climatic category: 30/100/56 • Maximum power: 60mW • Test voltage: 1.25kVAC for 1 seconds

B57703

Features: • High accuracy • Easy mounting • Good thermal coupling through metal tag • Encapsulated in metal tag case • PTFE insulated leads of silver-plated nickel wire, 30AWG • UL Approval (E69802)
Applications: • Surface temperature measurement (housing and pipes)
Specifications: • Climatic category: 55/125/56 • Maximum power: 150mW
• Test voltage: 1kVAC

GE Sensing & Inspection Technologies

NTC Bead Thermistors

Thermometric Type C100 Thermochip's are low cost, epoxy coated chip thermistors which represent the highest level of thermistor technology. Thermometric's exclusive "state of the art" materials processing techniques have been proven through extensive field use and long term testing to provide stable, rugged, easy handling thermistors suitable for applications in the temperature range of -80°C ~ 150°C. Best stability is achieved at temperatures not exceeding 105°C. Type EC95 and Type DC95 Thermistors may be used at temperatures as low as -80°C and as high as 150°C, however, best overall stability is achieved with exposure or storage temperatures lower than 105°C.

THERMAL AND ELECTRICAL PROPERTIES: • Dissipation Constant: (Still Air) 1mW°C, (Stirred Oil) 8mW°C **• Thermal Time Constant:** (Still Air) 10 Seconds, (Stirred Oil) 1 Second **• Maximum Power Rating:** .075 Watts (De-rated from 100% at 25°C ~ 0% at 100°C)

Type C100

Ø.012 (0.30)-Tinned copper leads
Epoxy coated thermochip

Type DC95 Thermistors are designed to be interchangeable over 0°C ~ 70° and 0°C ~ 100°C.

Ø.012 (0.30)-Tinned copper leads
Epoxy coated thermochip

Type EC95 Thermistors are designed to be interchangeable over -20°C ~ 50°C and 0°C ~ 70°C.

Ø.008 (0.20)-Tinned copper alloy leads
Epoxy coated thermochip

DK Series

The DK range of DO-35 packaged NTC thermistors is designed for temperature measurement and control in applications which demand cost effective reliability. The hermetically-sealed construction combines the advantages of high temperature operation and high reliability of glass bead types with the closer tolerances associated with chip devices. The glass encapsulation offers the additional benefit of high voltage insulation. **Applications:** • Domestic Appliances • Automotive Systems • Data Processing Equipment • Heating/Ventilating/Air Conditioning Control

Panasonic

Multilayer Chip NTC Thermistors (ERTJ)

The Multilayer Chip NTC Thermistors are especially designed for surface mountings featuring the miniature sizes of "0201", "0402" and "0603" type (EIA) with highly reliable multilayer and monolithic structure. **FEATURES:** • Highly reliable multilayer/monolithic structure • Superior heat resistance to reflow soldering and excellent solderability thanks to the unique external electrodes of three metallic layers • Operating Temperature Range: -40°C ~ 125°C • Resistance to Soldering Heat: 270°C-3s, 260°C-10s • Heat Dissipation Constant (mounted on a glass epoxy,1.6t): **0201 Series:** approximately 1mw/°C, **0402 Series:** approximately 2mw/°C and **0603 Series:** approximately 3mw/°C • Rated Maximum Power Dissipation: **0201 Series:** 33 mW, **0402 Series:** 66 mW and **0603 Series:** 100 mW

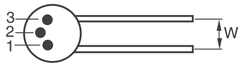
† For Tape and Reel part number, change CT-ND to TR-ND.

Panasonic

NTC Thermistors

1 and 2: Significant digit; 3: Multiplier

Uses standard resistance color codes.



FEATURES:

- Resistance temperature coefficient is negative and extremely large
- Wide selection of temperature coefficient (constant B)
- Excellent electrical and thermal stability
- Color coded to indicate resistance value @ 25°C

SPECIFICATIONS:

Maximum Watt Rating: (W): PNT101-121 – 0.4; PNT128-138 – 0.6. Nominal Time Constant (second): PNT101-121 – 20; PNT128-138 – 27.

APPLICATIONS:

- For measuring equipment: thermometer, wind gauge, liquid level gauge, temperature controller
- For temperature compensation: transistor circuit, measuring equipment
- For driving: Delay setting in relay operation, inrush current surge protection, communication equipment, AGC, time lag

NVE CORPORATION

GT Sensors for Gear Tooth Applications

NVE's GT Sensor products are designed for industrial speed sensing where magnetic detection of gear teeth and magnetic encoder wheels with large air gaps are required. GT Sensors with both analog and digital outputs are available. All parts operate down to zero speed. The analog parts feature varied spacing of the sensor elements on the IC to provide usable output signals for even the smallest gear teeth. Single bridges provide speed information, and dual bridges provide speed and direction. The digital sensors take advantage of the GMR sensor element's superior magnetic performance to provide a 50% duty cycle output over variations in voltage and temperature.

Features: • Input Voltage Range: Maximum: 30V • Operating Frequency: Minimum: DC, Maximum: 1MHz • Temperature Range: -50°C ~ 150°C • Maximum Output: Nominal: 80mV/V • Resistance: 5K typical

AFL Series - Low Power Digital Switch Parts

Featuring low magnetic field operate points and very low power consumption, the AFL series digital switch sensors are the first high precision digital magnetic sensors suitable for continuous operation in battery powered applications. Precise magnetic operate points of 10 Gauss are maintained, along with operating voltages down to 0.9V. Current sinking and current sourcing outputs are available.

Features: • Operating Point: 10 Gauss ±3 Gauss • Operating Frequency: Minimum: DC, Maximum 100kHz • Minimum Operate/Release Point: Differential 2 Gauss • Maximum Output: 100µA

GMR Analog Magnetic Field Sensors

NVE's Giant Magnetoresistive Field Sensors offer unique and unparalleled magnetic sensing capabilities. The high sensitivity and ability to sense static magnetic fields provide superior performance which sets them apart from other sensors on the market today. NVE's sensors provide high sensitivity, temperature stability, low power consumption, and small size.

Features:
• Input Voltage Range: Maximum: ±25V • Operating Frequency: Minimum: DC, Maximum: ±1MHz • Temperature Range: -50°C ~ 125°C • Maximum Output: Nominal: 45mV/V • Resistance: 5K typical, 30K typical for AA006, 2K typical for AAH

GMR Sensor Evaluation Kits

AG001-01: This kit features several types of NVE's AA and AB Series parts, a selection of permanent magnets for activation or bias purposes, and circuit boards to mount the parts for testing purposes. Also included is a copy of NVE's catalog and applications notes on CD ROM.

AG003-01: Facilitates laboratory experimentation and development using GMR current sensors. The kit consists of (4) NVE current sensors (PN AA003-02) assembled to printed circuit board (PN AG002-01). The PCB has (4) trace geometries to simulate various PCB current sensor configurations.

AG910-07: Includes over 15 different GMR switch digital magnetic sensors with different operating points and different output configurations (current sink and current source). Magnets, circuit boards, a ZIF socket for easy testing, and NVE's catalog and application notes on CD ROM are included.

AG920-07: Kit includes analog and digital versions of the GT Sensor products, for gear tooth sensing applications. A large variety of circuit boards and magnets are included for bench testing purposes, along with NVE's catalog and application notes on CD ROM.

cynergy3 components

Float Sensors

Liquid level sensors are cost effective sensors for detecting the presence or absence of liquids. Perfect for vending machines, commercial washing machines, evaporator units and any upper and lower liquid level sensing applications. Horizontal sensors can be turned 180 degrees for opposite detection. UL approved E171218.

Vikuiti™ Durable Quick Clean Matte Film (DQC-M)

Vikuiti Durable Quick Clean Matte Film is an easy, cost-saving way to repair many types of LCD damage. The specially designed adhesive on Vikuiti DQC-M Film fills in most screen surface irregularities so they are virtually undetectable. DQC-M is a quick fix that will save you time and money over replacing the polarizer and/or the entire LCD module.

Infrared Touch Screens

E and K Series Infrared Touch Screens:

Infrared technology uses infrared emitter-collector pairs to project an invisible grid of light a small distance over the surface of the screen. When a beam is interrupted, the absence of the signal at the collector is detected and converted to an X/Y touch coordinate.

Features:

• Super Transparency • High Resolution (Interpolated 4096 x 4096) • Fast response time • Versatile Touch Object • No Drift • Scratch Resistant • Water/Dust Resistant (IP65) • Sunlight Operable • Integrated Controller • Wide Temperature Range (-40°C ~ 70°C) • Robust Design • Long Life Expectancy

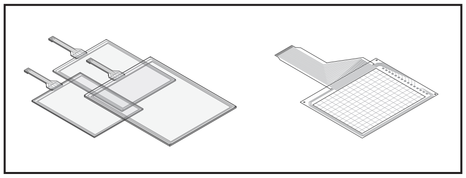
NEW! Resistive Touch Screens

5-Wire, 4-Wire and Digital Solutions



NKK's transparent touch screens are engineered to complement the application of choice while offering superior durability and flexibility. With options in multiple sizes, and choices of input by finger, gloved finger or stylus, NKK maintains a consistent focus on impeccable quality and value added solutions with the diverse needs of customers at the forefront.

Whether an application requires the 5- or 4-Wire technology, the features include metal tails (analog), contact reliability with a connector, and ANR film, eliminating many of the typical visual artifacts. The film surface is non-glare and hard coated for ease of use and integrity of the surface.

Additional benefits of NKK's 5-Wire touch screens include: • Screens highly resistant to static electricity and noise pollution • Drift-free operation despite any temperature fluctuation • Greater touch point density translating to more precision and reduction of false actuations • Quicker response time

5-Wire and 4-Wire Resistive Touch Screens

5-Wire Resistive Touch Screens:

The Bergquist 5-Wire Resistive Touch Screens are inherently the most durable resistive touch screens on the market, engineered to withstand high-usage environments. Unlike other resistive technologies that use two opposing layers to create X- and Y- axis measurements (such as 4-wire and 8-wire technologies), 5-wire sensors utilize a stable glass substrate for both X- and Y- axis measurements. **Features:** • Durability: 35 Million actuations/ Drift-free operation at all times • Accuracy: 98.5% accurate - without external electronic correction • Actuation: Any finger, glove or stylus • Optics: Index-matched materials provide 81% light transmission and patented spacer dot design • Warranty: All 5-wire touch screens come with a 5-year warranty

4-Wire Resistive Touch Screens:

Bergquist offers a full line of optimized 4-Wire resistive touch screens. Standard size offerings are available, as well as custom solutions to ensure a cost effective solution for any application. Bergquist optimized 4-Wire resistive technology solutions are rated for 10 million single point activations and feature enhanced coatings to increase brightness and reduce reflection. **Features:** • High resolution • Not effected by dirt and water • Low cost • Low power consumption • Durability: 10 Million single point activations • Actuation: finger, touch stylus, or gloved hand • Warranty: 1-year limited warranty

Touch Screen Starter Kit

Contains: • Touch Screen Controller • RS-232 and USB Cable • Software and Drivers • 110V Power Supply • Documentation and Manuals • Plastic Case • Storage space for touch screen

Note: *Appropriate touch screen must be purchased separately*

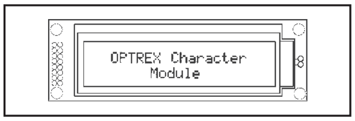
Character LCD Modules

RoHS COMPLIANT



Optrex Character Displays:
Optrex offers the broadest range of monochrome character LCD modules in a wide range of dot pixel formats and color/background combinations in industry-standard configurations. Ideal for handheld meters and other devices requiring a clear alpha-numeric display, they provide high contrast, wide operating temperature ranges, low operating current, and more luminance per watt.

Positive (*transflective*) types and negative (*transmissive*) types utilizing Optrex's High Performance Color technology are available.

Amulet Technologies

Human Interface Electronics

4.3” GEMmodule™ (MK-480272C): It is a fully integrated 4.3” WQVGA production color display module to support a variety of embedded control interface applications. Featuring the Amulet GEM Graphical OS Chip™ for color displays, the module supports GIF, JPEG and PNG graphic formats in 24-bit color, plus 8-bit alpha blending found in high-end consumer electronic products.
GEM Starter Kit - Color (STK-480272C): The kit provides everything needed to create and drive a color GUI display, including a 480 x 272 TFT display, an integrated touch panel and controller board, downloadable compiler software, a 5VDC power supply, stylus, and USB PC interface cable.
3.8” Starter Kit (STK-GT380): The kit includes a 3.8” module QVGA monochrome display with a six ultrabright LED backlight, a fully integrated analog touch panel, and integrated Amulet Compiler Software, a serial cable, stylus, and 5VDC power supply.
5.7” On-Board Starter Kit (STK-AOB3202405): The Starter Kit includes a 5.7” Amulet-on-Board Module with integrated touch screen and LED backlight. In addition, you will receive the Amulet compiler software, serial cable, program interface board, 5V power supply and stylus.
GEMexpress™ Universal TFT/OLED Driver PCBA (GCC-1): A fast, inexpensive production solution for adding a graphic user interface to an embedded product. GEMexpress allows for greater design flexibility and a shorter time to market.
Graphical OS Chip™ for Color Displays (AGB75LC04-QU-E): The GUI processor for color displays enables OEMs and design firms to take their products to the next level by implementing interactive, color-rich GUIs designed in dynamic HTML.

MATRIX ORBITAL Serial/I^{2}C LCD, VFD and PLED Displays

RoHS COMPLIANT

Specifications:

Standard Voltage: 4.75V ~ 5.25V **LCD Type:** • Covers most of the popular LCD configurations. Control of these modules has been simplified to a set of commands delivered to the modules via RS232 and I^{2}C communications protocols. **VFD Type:** • Brightest of all displays • Performance is not affected by temperature. **PLED Type:** • Self-luminous displays that do not require backlighting • Use much less power than a traditional LCD or VFD • 160-degree viewing angle

Additional options for increased voltage and higher operating temperatures are available. For pricing, options and availability, visit our website.

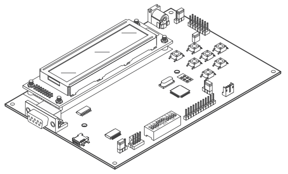
NEW! DevDevil Boards

RoHS COMPLIANT

DevDevil is a product development board that provides all of the functionality of an alphanumeric display in a project development friendly package. The DevDevil opens the door to a world of exciting display possibilities.

Features:

- 5x5 Keypad Matrix input
- Mini-USB onboard connector with USB cable
- Six general purpose outputs (GPOs) or 6 LEDs
- Dallas one wire support
- Seven physical buttons
- One 20x2 or 20x4 LCD display



Description	Digi-Key Part No.	Price Each	Matrix Orbital Part No.

Note (1): Continuous RMS Voltage.

J.W. Miller MAGNETICS A Bourns Company SMT, CCFL Inverter Transformers

Features: • Power Rating: 6 Watts • Operating Frequency: 60kHz -/+25% • Operating Ambient Temperature: 0°C ~ 75°C • Storage Temperature: -40°C ~ 105°C • Dielectric Withstanding Voltage: 1500Vrms
Applications: • LCD flat panel displays • Notebook / Palmtop computers • Portable instruments • Retail terminals

TAIYO YUDEN DC-AC Inverters for CCFL's

This line of low profile DC to AC inverters are designed to drive cold cathode fluorescent lamp (CCFL) backlighting for LCD displays and are recommended by Sharp, Epson, Optrex, Hitachi, Toshiba and other LCD manufacturers. Superior design techniques are used to provide some of the market's lowest profile CCFL inverters.

Microsemi

CCFL Inverter Modules

Features: • 3.3V, 5V and 12V inputs • Power levels from 2.2W to 10W • Programmable maximum output current • Widest dimming range, patented digital "Direct Drive" and Analog • Easy to use brightness control, allows smooth flicker free dimming • Output short-circuit protection and timeout • Automatic strike voltage regulation and timeout

Advantages: • Low component count • Duty cycle brightness control provides wide brightness range and extends battery management options • Low cost • Reduction in magnetics size • Wide LCD panel compatibility • Maximum efficiency, especially in battery mode **Options:** • 4 Wattages: 2.2W, 4W, 6W, 10W • Multiple connector styles

CCFL Controllers and Input Cable Assemblies

RoHS COMPLIANT

LX1686E: This Backlight Controller IC provides all the control functions needed to implement Microsemi's direct drive inverters used to operate cold cathode fluorescent lamps (CCFL's). **LX1689:** The latest generation Direct Drive CCFL uses new circuit design techniques (patents pending) and combines digital and linear circuits with advanced BiCMOS process to create a more complete controller in a small package. **LX1691:** This cost reduced, enhanced feature set Direct Drive CCFL architecture is based on the very popular LX1689. By limiting V_{DDP} to 5.5V and using advanced processing, die size and package pin count is decreased while improving dimming precision. LX1691 based inverter modules can be designed for virtually any CCFL appliance from digital cameras and PDA's to big screen monitors and driver viewable automotive displays. **LX1691A:** This enhanced Direct Drive CCFL architecture is based on the LX1691. LX1691A based inverter modules can be designed for virtually any CCFL appliance from digital cameras and PDA's to big screen monitors and driver viewable automotive displays.

Noritake Vacuum Fluorescent Display Modules

RoHS COMPLIANT

U Version:

VFD over LCD Advantages:

- Higher Brightness
- Wider Viewing Angle
- Wider Temperature Range

Features:

- LCD compatible interface
- Same mounting locations as LCD
- 5V single power supply
- Power save mode (display off)
- 4 level brightness control (by code)
- 8-bit or 4-bit interface
- 8 user definable fonts
- Power consumption similar to LCD with LED backlight
- Color: Blue-Green

Y Series:

Features:

- Easy command set
- 2x the brightness with the brightness boost
- Highlight character
- 16 UDF and 1 custom font table
- 14 International font tables and 10 extended ASCII
- Select from 1x1, 1x2, and 2x2 character sizes
- More characters in compact display size
- 1U rack height models available
- Available in i80 8-bit parallel, asynchronous serial, synchronous serial, and async RS232 interfaces
- Reliability in all environmental conditions
- Wide temperature range of -40°C ~ 85°C

Graphics Vacuum Fluorescent Display Modules

GUD3000/7000 Graphic Development Kits:

Prepares development strategy for the Noritake 3000 or 7000 Series from your Windows PC using the GUD3000 or GUD7000 development kit.

Complete Development Kit Includes:

- GUD3000 256 x 64 or GUD7000 140 x 32 Graphic Display and stand, assembled.
- Serial Signal/ Power wire harness (RS-232 interface)
- Power Supply
- CD with application

Microsemi ***NEW!*** Displays and Drivers

The DC-Plasma , Easy-to-read, 7-Segment Screen Image Display is arranged as 5 columns by 3 rows and features bright neon-orange pixels, wide viewing angle, and sharp contrast. The slim profile, compact outline, and large viewing area make efficient use of valuable system, front panel space. Inherently rugged, DC-Plasma displays are a cost-effective solution when overcoming vibration, temperature, or EMI/RFI issues.

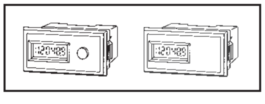
red lion Counters and Timers

CUB3 and CUB3T



The CUB3 is a battery-powered up counter for counting dry contact closures from switches or relay contacts. Built-in debounce circuitry ensures accurate counts up to 100 Hz. It can also be used with transistor closures and has a reset button on the front of the counter.

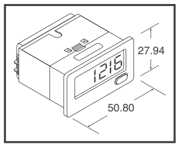
NEW! CUB7 Series Counters and Timers



The CUB7 and CUB7T are 8-digit miniature counters or timers with large 0.35" (8.89 mm) high digits. The LCD read-out is available in Positive Imagine Reflective, Negative Image Transmissive with yellow/green or red LED backlighting. The backlight version requires an external 6 ~ 26VDC power supply. The CUB7 series is housed in a lightweight, high-impact plastic case with a clear viewing window. The sealed front panel with the silicone rubber reset button meets NEMA 4X/IP65 specifications for wash-down and/or dusty environments when properly installed. **Features:** • Replaceable internal lithium battery provides up to 7 years of uninterrupted operation • Front panel reset or remote reset • Connections: Wire clamping screw terminals • Fits DIN standard cut-out 1.77" (45 mm) x 0.874" (22.2 mm) • Low speed count to 30 Hz from switch closure or O.C. transistor; High speed count to 10 kHz (CUB7)

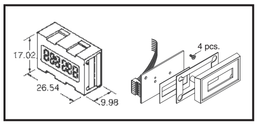
SUB-CUB 1 and 2 Counters



SUB-CUB 1 and 2 are component-type up counters designed to be snapped down onto a standard 1/16" PCB. Solderless elastomeric pads contact copper pads on the PCB for inputs, reset and display latch and test functions. Solderless connections are corrosion-proof, gas-tight interface contacts for high reliability. Ultra low power (5V at 15μA typical) and latchable display with automatic leading zero blanking.

SUPER SUB-CUB provides all the capabilities of SUB-CUB 1 and 2, plus four operating modes capable of bi-directional counting, quadrature counting, coincidence counting and anti-coincidence adding and subtracting. Optional bezel mounting kit provides a crisp, clean panel-mount option for panel-mounted applications.

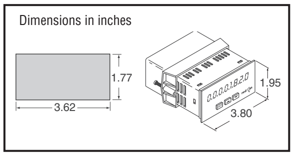
PAX Lite Meters



PAX Lite DC Current and Voltmeters

Specifications: • Power: 115/230VAC, switch selectable, 50/60 Hz • Input Ranges/Resolution: Selectable by jumper connections • Accuracy: • DC Voltmeters: 1mV, 10mV, 100mV or 1V • DC Current Meters: 199.9 μA/199.9 mV, 1.999 mA, 19.99 mA, 199.9 mA or 1.999 A • Over-Range Indication: on all modes is indicated by blanking 3 least significant digits

RLC105-ND (PAXLID00) PAX Lite DC Current, 3 1/2-Digit, LED Meter.................................... **$113.36**
RLC107-ND (PAXLVD00) PAX Lite DC Voltmeter, 3 1/2-Digit, LED Meter.................................. **$113.36**
RLC109-ND (PAXLIT00) PAX Lite Large AC Current, 3 1/2-Digit, LED Meter.............................. **$160.16**

PAX Lite Current Loop Meter

Specifications: • Power: AC Power: 85 ~ 250VAC, 50/60 Hz, 6VA • Input Resistance: 4 ~ 20 mA - 29.2 Ω, 10 ~ 50 mA - 11.8 Ω • Span: 32 coarse steps (binary progression with 5 DIP switches) Each step providing approximately 8.125 numerical units/mA/step sensitivity for 4 ~ 20 mA input and 3.25 units/mA/step for 10 to 50 mA input.

RLC112-ND (PAXLCL00) PAX Lite Current Loop, 3 1/2-Digit, LED Meter.................................. **$160.16**

PAX Lite RTD Meter

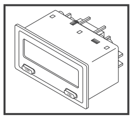
Specifications: • Controls: Three front panel push buttons for meter set-up; rear terminal input for disabling the front panel • Accuracy: 0.3°C, @ 23°C and 30 minutes warm-up • Reading Rate: 2.5 readings/second • Response Time: 2 seconds to settle for step input (increases with programmable digital filtering) • Operating Temperature Range: 0°C ~ 50°C

RLC115-ND (PAXLRT00) PAX Lite RTD, 4-Digit, LED Meter **$199.68**

4" High Digit Timer

RLC125-ND (LD4T06P0) 4.0" (101.60mm) High 6 Digit Red LED Timer, 120VAC............................ **$681.20**

CUB5 Series



The CUB5 provides the ultimate in flexibility, from its complete user programming to the optional relay output capability. The meter can be programmed as a single or dual counter with rate indication capability. As a dual counter, each counter has a separate scale factor and decimal point. In the counter/rate indicator mode, each has its own scaling and decimal point read-out in different engineering units. The display can be toggled either manually or automatically between the selected displays. The CUB5 can be powered from an optional Red Lion Micro-Line/Sensor Power Supply (RLC124-ND) which attaches directly to the back of the CUB5. The RLC124-ND is powered from 85-250VAC and provides up to 400mA to drive the unit and sensors. **Specifications:** • Display: 0 ~ 999999 • Over Range Display: "R OLOLOL" • Maximum Frequency: 20kHz; Minimum Frequency: 0.01Hz • Accuracy: ±0.01% • Operating Temperature: -35°C ~ 85°C • Connections: Wire clamping screw terminals • Count/Rate Signal Input A: DIP switch selectable to accept pulses from variety of sources; Input B: Logic signals only

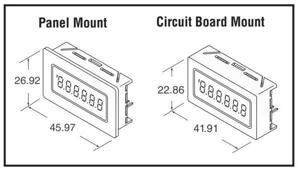
MDMU Counter



The MDMU is a complete 6-digit counter in a small panel mounted or printed circuit board (PCB) mounted package. It is designed to operate from a 5VDC power supply. It has a 6-digit LCD with 0.35" (8.89mm) high digits and 5 selectable decimal points. In the timer mode, a flashing annunciator is supplied to indicate that the signal input of the MDMU is active. The displays are available in Positive Image Reflective (black digits, reflective background) or Negative Image Transmissive (illuminated digits, dark background) with red or yellow/green backlighting.

Features: • LCD: Positive Image Reflective or Negative Image Transmissive with yellow/green or red LED backlighting • 10 ranges in timer mode • Selectable decimal points • 5VDC powered • Panel mount or PCB mount

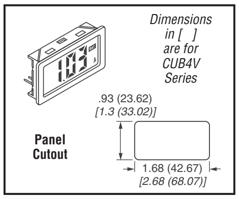
Miniature Display D.C. Voltmeter



MDMV Series: Specifications • Display: 3-1/2-digit, 0.4" (10.2mm) high digits. A minus (-) sign is displayed when voltage is negative • Decimal Points: Selectable decimal points are activated at the rear terminal pins to allow the display to be read in tenths, hundredths or thousandths • Annunciators: 5 selectable annunciators, BAT, V, A, μ and m are activated at the appropriate rear terminal • Power Requirements: 4.8VDC ~ 6VDC @ 5mA Maximum • Input Range: 0 to ±199.9m VDC • Over-range Indication: Over-range is indicated by a "1" displayed in the most significant digit and the blanking of the three least significant digits • Reading Rate: 2 1/2 readings per second • Common Mode Rejection Ratio: 70dB • Input Impedance: 1000MΩ • Operating Range: 0°C ~ 60°C

CUB4V Series: Specification: • LCD, positive reflective or negative transmissive with yellow/green or red backlighting • Four selectable D.C. ranges (0-199.9 mV, 1.999 V, 19.99 V, 199.9 V) • 0.6" (15.24mm) high LCD digits • Built-in scaling provided • Auto-zeroing circuit • Selectable decimal points • Wire connections made via screw clamp type terminals • Fits DIN standard cut-out 2.68" (68mm) x 1.30" (33mm) • NEMA 4X/IP65 sealed front panel bezel • 9 ~ 28VDC powered

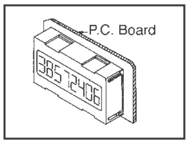
SUB-CUB D



The SUB-CUB D is a completely self-contained 8-digit counter module for high speed counting, with counting rates to 750 kHz. Counters are designed to be snapped down onto a standard 1/16" PCB. Solderless elastomeric pads contact copper pads on the PCB for inputs, reset and display latch and test functions. Solderless connections are corrosion-proof, gas-tight interface contacts for high reliability.

Optional bezel mounting kit provides a crisp, clean panel-mount option for panel-mounted applications.

* Requires Adhesive Strips (recommend 2 pads for the 91.44mm Bezel)

Jewell Instruments MODUTEC

Analog Panel Meters

The PB Series was designed to meet the expressed need of many customers for meters with a hard-hitting, big-dial-area "industrial" look.

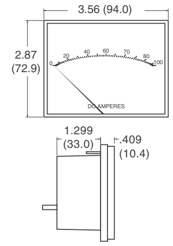
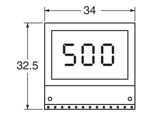
S Series - Rectangular



Miniature Backlit 1000 Series



Specifications: Display: • Digits: 3 1/2 digits (1999) • Digit Height: 0.3" (7.6mm) • Decimal Point: 3 positions, external selection • Type: 7 Segment Backlit LCD • Polarity: Automatic (-) displayed • Overload: Three lower digits blank for readings greater than 1999 **Input:** • Full Scale Range: ±2V or ±200m VDC • Input Resistance: ±100MΩ • Overvoltage Protection: 100VDC or peak AC conditions **Performance:** • Accuracy: = (0.25% + 1 count) Maximum • Common Mode Rejection: ≥ 86db 50Hz-60Hz • Zero Adjust: Automatic • Conversion Rate: 2.5 Per Second • Tempco: 100 PPM/°C **Environment:** • Operating Range: -0°C ~ 60°C • Storage Range: -20°C ~ 70°C **Extended Temperature (option):** • Operating Range: -30°C ~ 80°C • Storage Range: -40°C ~ 85°C **Power Options:** • +5VDC and -5VDC ±10% @ 150ua DC or 9VDC (7.2 ~ 12VDC isolated @ 150μADC)

Note: For the battery powered DPM, the input must either be fully isolated from the power source, or, if referenced to the source, the IN LO terminal must be no closer than 2.3V for the 200mV range (3.5V for the 2V range) to either battery terminal.

Murata Power Solutions Digital Panel Meters

Formerly DATEL

DATEL offering of digital panel meters has been recognized as the industry's most versatile and affordable. In addition to offering a broad range of off-the-shelf products, it can provide applications for specific solutions with the latest designs. DATEL ammeters feature easy set-up and installation and typically require no additional components or user set-up. Average responding or true-rms inputs can measure current values of triangle waves, square waves, and other irregularly-shaped waveforms with an accuracy of ±1% of full scale.

OMRON

NEW! H3FA Solid State Timers

The H3FA Series is a small compact timer integrated into a PCB relay to give Delay-On or Time Limit Resetting operations. The built-in potentiometer can be used for convenience or may be used as an external potentiometer for time control and accuracy. Timers also come with a remote start pin to trigger timing operations and a reset pin once timing has expired. **Specifications:** • Control Outputs: Contact output: SPST-NO + SPST-NC, 3A at 250VAC with resistive load • Accuracy of Operating Time: ±0.5% FS max. • Reset Time: 10ms max. • Approved Safety Standards: UL508, CSA C22.2 No. 14

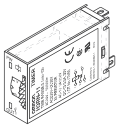
H3RN Compact Analog Timers



Features:
- Multiple operating modes, DIP switch selectable, ON-delay, Interval, Repeat cycle ON-Start/OFF-Start
- Standard multiple time ranges: Short range (0.15 ~ 10 minutes) Long range (0.1 minute ~ 10 hours)
- Pin configuration compatible with G2R-IS

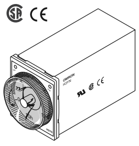
Low Cost H3YN Timers



Features: • Improved miniature timer relay that operates in 4 selectable modes: ON-Delay, Interval, Repeat Cycle, ON-Start (selectable by dip switches) • Independent Power-ON and Time-Up indicators show relay status instantly • Control Outputs: DPDT: 5A at 250VAC, resistive load; 4PDT: 3A at 250VAC, resistive load • Operating Temperature: -10°C ~ 50°C • Mechanical Service Life: 10,000,000 operations minimum • Electrical Service Life: DPDT: 500,000 operations minimum; 4PDT: 200,000 operations minimum For mounting socket, use Z882-ND (DPDT) or Z811-ND (4PDT)

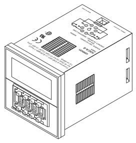
Solid State Timers

Series H3CA – Digital Bar Graph



Features: • A simple programmable timer to setup and read with presetable thumb wheel switches for time and mode selection. Also features a simple time-remaining LCD bar graph and LCD status indicator for easy viewing • Operations include: ON-delay, Repeat-cycle, Signal Interval/OFF-delay, Signal-OFF delay (I and II), Interval, Cycle and Signal ON-delay/OFF-delay

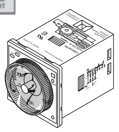
H3CR Analog Timers



Features: • Field-selectable time ranges from 0.05 second to 300 hours • Use for delay timing, repeatable cycles or duration (interval) timing. Built-in DPDT relay switches when timing cycle is complete. • Timing Functions: ON-delay, Repeat cycle (B, B2), Signal ON/OFF delay, Signal OFF-delay, Interval **Specifications:** • Supply Voltage: 100VAC ~ 240VAC, or 24 ~ 48VAC/12 ~ 48DC • Operating Voltage: 85% ~ 110% of rated supply voltage • Control Output: Type - DPDT relay, Maximum load - 5A, 250VAC, minimum load - 10mA, 5VDC • Repeat Accuracy: ±0.3% full scale maximum, except in 1.2 range ±0.3%, ±10ms

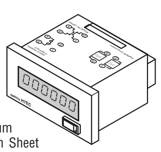
Count Totalizer



Omron's self-powered totalizing counters feature either no-voltage inputs, DC voltage only or combined AC/DC voltage inputs. Offered in both 1kHz input for high speed, no chatter input signals or 30/20 Hz inputs for relay and switch (high chatter) inputs. **Specifications:** • Input: AC/DC voltage — 24 ~ 240VAC/VDC or 6 ~ 240VDC at "High" (logic) level • DC Voltage — 4.5 ~ 30VDC at "High" (logic) level • No-Voltage — Maximum short-circuit impedance: 10kΩ maximum • Reset Time: 20ms reset signal. • Instruction Sheet Included • Number of digits: 8 • Display: LCD Digital, 0.2 in. high. Replaceable battery.

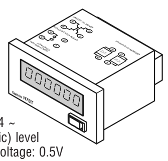
Time Totalizer



Omron's self-powered time totalizer displays cumulative time by counting the output signals received from a sensor. When the proper input has been applied, the timing circuit is enabled allowing the timer to start, disabling the inputs will stop the timing sequence. Key protect Switch to prevent front resetting. Replaceable battery. **Specifications:** • Supply Voltage: Not required (powered by built-in battery) • Input: AC/DC voltage — 24 ~ 240VAC, or 6 ~ 240VDC at "High" (logic) level; DC voltage — 4.5 ~ 30VDC at "High" (logic) level No-voltage — Maximum short-circuit impedance: 10kΩ maximum Short-circuit residual voltage: 0.5V maximum. • Reset Time: 20ms reset signal • Terminal: Screw type • Instruction sheet included

Tachometer Counters

Omron's self powered tachometers offer a large display (8.6mm) with various input types available. Selectable multiplier/divider network allows either RPM or RPS measurement. Comes with waterproofing gasket and panel mounting bracket. Screw terminal connections. 4 digits. Maximum counting speed 1kHz.

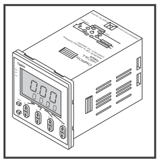
OMRON

Digital Relay Timers

H5CX Series



Features: • Field-selectable time ranges from 0.001 second to 9999 hours • High-visibility alphanumeric LCD display has 11.5mm high characters and built-in backlight • Selectable elapsed time (UP) and time remaining (DOWN) display • Timing functions: 11 selectable, including ON-delay, repeat cycle, OFF delay, interval, and one-shot • Programmable display color to alert any output status change

Specifications: • Operating Voltage: 85% ~ 110% of rated voltage • Relay Control Output: Maximum load - 5A, 250VAC; Minimum load - 10mA, 5VDC • Memory Function: Retains preset values for 10 years at 25°C • Operating Temperature: 14°F ~ 131°F (-10°C ~ 55°C) • Mechanical Service Life: 10 million operations minimum • Electrical Service Life: 100,000 operations minimum at 5A, 240VAC, resistive load (p.f. = 1)

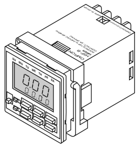
Digital Daily Timers



Features: • Precise control of both regular and special ON/OFF times • Can be set for timed or pulsed operation, and for multiple-day operation

Specifications: • Operation: 1. Daily operation (Multiple-day operation possible) 2. Pulse-output operation (pulse width can be set in units of 1 second from 1 ~ 59 seconds and in units of 1 minute from 1 ~ 60 minutes) 3. Partial operation on specified day 4. Forced ON/OFF operation • Repeat accuracy: ±0.01% • Memory protection: 5 years minimum • Life expectancy: 50,000 operations minimum (15A, 250VAC, resistive load) • Operating Temperature: -10°C ~ 55°C

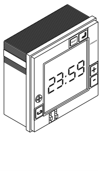
Programmable Weekly Timer

H5L Series



Features: • Large LCD display with 7 day x 24 hour programming • Perfect for controlling On-Off cycles for lighting, industrial and security • Two independent 15A control circuits and 16 step front program options allows fast and easy programming • Wire connections are made by screw terminals from either the front or the back **Specifications:** • Timer may be wall mounted, recessed into panel or din rail mounted • All mounting hardware and instructions are included • Optional protective hard plastic cover prevents accidental resetting and protects from dirt and water

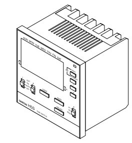
Programmable Weekly Timers

H5S Series



Features: • AM/PM display • Field-adjustable ON/OFF, cycle, and pulse output • A different program possible each day • Wide supply voltage range • Independent Day Keys provide easier operation • Temporary holiday setting function makes it easy to turn OFF output for holidays and non-operating days • Settings can be made even with the Time Switch turned off • Test mode enables easy program checking **Specifications:** • Supply Voltage: AC 100 ~ 240V • Long-term Error: ±15 seconds per month • Maximum Load: 15A, 250VAC resistive load • Connections: Terminal screws • Minimum Load: 100mA, 5VDC • Operating Temperature: -10°C ~ 55°C • 50,000 operations minimum, 15A, 250VAC, resistive load

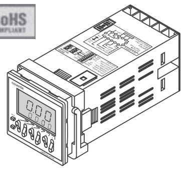
Preset Counters



Omron's multifunction counters feature large reverse-lit LCD which can be programmed to change from green to red (or red to green), providing long-range status information. H7CX counters allow users to choose between batch counter, dual counter, single or dual stage preset counter, tachometer or totalizer operation. **Features:** • Highly visible display with backlit negative transmissive LCD • NEMA4/IP66 compliance • 1-2 Stage Counter • Case Color: Black • Reset Indicator: Orange • Key Protection Indicator: Orange • 12VDC External Power Supply • Output Type: Contact • Supply Voltage: 100 ~ 240VAC

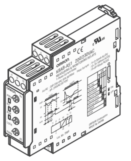
Monitoring Control Relays



Omron's K8 series of Monitoring Relays are designed for industrial measurements, controls and fault detection.

The **K8AB-AS** are single phase, current monitoring relays to monitor both under-current or over current conditions.

The **K8AB-PH** is a 3 Phase, phase-loss monitoring relay for reventing incorrect motor rotation and incorrect wiring.

The **K8AB-TH** are temperature monitoring relays for detecting upper and lower temperature limits. Selectable for J, K, T, E and Platinum Sensor Inputs.

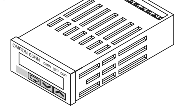
NEW! E5GN Digital Temperature Controllers



Omron's E5GN Temperature Controllers are 1/32 DIN sized controllers that accept any thermocouple or analog input. These are used for both heating and cooling and also feature NEMA 4X water-resistant construction.

Specifications: • Supply voltage: 100 ~ 240VAC, 50/60Hz • Operating Temperature: -10°C ~ 55°C • Sensor Input: Thermocouple: K, J, T, E, L, U, N, R, S, B, W or PL II • Control Output: Relay Output: SPST-NO, 250VAC 2A (resistive load) • Indication Accuracy: Thermocouple: (±0.5% of indicated value) • Voltage Output: 12VDC±15% (PNP), Maximum Load Current: 21mA, with short-circuit protection

E5AK/E5CK Digital Temperature Controllers

Features:
- Advanced digital process with fuzzy logic
- Field configurable outputs and options
- 100 ms sampling (for analog input)
- Advanced PID, or fuzzy self-tuning
- Water-resistant, NEMA 4X, IP66
- Remote set-point with optional event input board
- Set-point ramp
- Heat only or heat/cool control

Tyco Electronics P&B Timers/Time Delay Relays

Authorized Distributor

Potter & Brumfield timer relays are versatile time/function adjustable relays for industrial and time delay type applications. By setting the timing mode, selecting the time duration and applying 120VAC to power the timing circuitry, a dry contact relay will trip On or Off at the end of the set time. Delay-On or Delay-Off modes will start upon power up and delay turning the relay output On or Off for the user selected time. Using the Cycle or Repeat Mode will put the timer in a continuous On and Off cycle where the time On and time Off are equal lengths. Model CRB relays enable separate On and Off adjustable times for Cycle timing.

CST CUSTOM SENSORS & TECHNOLOGIES **Crouzet**

Millenium 3 Relay Controllers

RoHS COMPLIANT

Crouzet's latest generation of controllers is the Millenium 3 Logic Controllers. The Millenium 3 is even easier to program for simple timing, counting or control applications such as heating and air controls-zones, greenhouse controls, complex car wash cycles and industrial controls. Starter kit's include everything required to create, communicate and run your ladder logic program. Offered in 3 different versions, Standard type, Expandable type and Economy type.

Monitor Relays

RoHS COMPLIANT

Crouzet's Industrial monitoring relays are preset able liquid level, voltage, current or phase monitoring relays. Liquid level monitoring relays are designed for the purpose of filling or emptying liquid storage containers. Use voltage and current relays for the purpose of monitoring over voltage/current or under voltage/current conditions. Phase monitoring relays are designed for the purpose of monitoring correct phase and phase failure conditions.

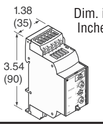
Control Relays

RoHS COMPLIANT



Dim. in Inches (mm)

Crouzet's liquid level control relay's are designed for control of upper and lower liquid levels. The resistive probe style is for conductive liquids measuring the resistance of two submerged probes. The level switch type uses a contact closure for control of the upper and lower liquid levels. Internal control relay is rated at 5A, SPDT for turning on pumps or larger relays. **Specifications:** Wide input voltage: 24 ~ 240VAC/DC

Totalizing Counters

Crouzet's fully integrated totalizing counter or total cumulative time counters. Choose between no-voltage inputs (contact closure) or wide in put voltage inputs (AC/DC) for count inputs or for enabling the time duration for the time counters. Presetable counters have internal output relay to trigger when preset count is reached. All counters are cUL and CE approved.

Specifications:
• Power: Lithium Battery • Count Inputs: Contact Closure (slow speed), Voltage Input (high speed) • Low Speed: 40Hz • Minimum Pulse: 12ms • High Speed: 7kHz, 4VDC ~ 30VDC • Connections: Screw Terminals • Operating Temperature: 32°F ~ 131°F

NEW! Industrial Pneumatics

Crouzet pneumatics are used to control the functions of pneumatically powered process machinery and robotics for industry. Some of the most common air powered replacement switches, valves and detection devices are shown. Intrinsically safe valves are for hazardous working areas where explosion proof requirements are mandated. Position detectors are air powered switches for detecting the presence of objects.

Analog Timer Controls

Crouzet's Chronos series of timers are their newest timers with improved features such as greater accuracy, LED status indicator, 3 wire sensor control option and a heavy duty 10A relay. Perfect for all delay-on/off functions as well as Interval timing, repetitive cycle timing and remote triggered sequence timing. All timers are cUL and CE approved.

Hour Meters and Counters

Curtis Modules are ideally suited for OEM's panel makers and contract manufacturers to measure equipment usage for preventive maintenance, scheduling, warranty validation and renting/leasing. No moving parts or motor driven digits to wear out. Non-volatile memory can be powered down and not lose hours counted. Counting starts with enable connection and counts display when power is applied to the meter. External reset is standard. The counters can be used in vending machines, medical equipment, fuel pumps, office equipment, flow instruments, consumer products and many other applications. Operating Type: • 2 wire units (700 Series) start timing when supply power is applied • 3 wire units (701 Series) start timing when 3rd lead (enable lead) has power applied

Features: • Wide voltage range • AC/DC operation on most products • Input Frequency of 500Hz on DC counters • Exceptional reliability due to non-volatile (EEPROM) memory which can retain data for 25+ years **Specifications:** • Resolution: 99,999.9 hours • Accuracy: ±0.1% hours • Mechanical Shock: SAE J1378, 55g • Operating Temperature: -40°C ~ 85°C

703 Series: 6-digit Pulse Counter module with 5mm (.197") high digits, non-backlit. **Specifications:** • Resolution: 999,999 Counts • Accuracy: ±1 count • Mechanical Shock: SAE J1378, 55g • Operating Temperature: -40°C ~ 85°C

Hour Meters

The Cramer line of ETIs (Elapsed Time Indicators) are used to record the amount of “on-time” operation for industrial and commercial grade equipment. Resettable and Non-resettable versions are available either in round or square bezel, displayed in tenths of an hour. **Applications:** • Indicating, monitoring and recording a process where the time used is required • Recording “on-time” usage of machinery for billing purposes • Preventative maintenance for machinery or equipment **Features:** • Large, easy-to-read numbers • Rugged design • Continuous duty • Tamper proof • Permanently lubricated • Square, round or rectangle bezel **Specifications:** • Power Consumption: 2.7 watts • Working Voltage: 110VAC/115VAC • Electrical Connections: 6” leads, 22 gauge wire • Operating Temperature: -20°C ~ 55°C • Mounting: Front panel • Agency Approval: UL, CSA

QM Series 2-Wire Panel Meters

The QM Single Mounting Hole Series are Nema 4 rated meters for simple commercial and industrial applications. To install, the user needs only to drill a single 7/32” (5.5mm) hole in the panel. A rubber seal is included, providing splash-proof protection for the unit when fitted to the meter during installation. Includes: meter, mounting nut, washer and panel seal. All meters have reverse polarity protection. **QM Voltmeter:** 2-wire voltmeter powered from the voltage that it is measuring. The module indicates “LO” at voltages below 4V and “HI” at above 25V (40V for QM100V-40). **Specifications:** • Measured Input Voltage: 4 ~ 25VDC (QM100V), 4 ~ 40VDC (QM100V-40) • Supply Voltage: 3 ~ 50VDC • Sample Rate: 3 samples/second • Operating Range: 0°C ~ 50°C

Series 10 Universal Volt/Ammeter

The DPM1, 2 and 3AS-BL features 200mVDC measurement with auto-zero and auto-polarity. Decimal points are user selectable. The DPM1, 2 and 3AS-BL feature a negative rail generator which enables the meter to measure a signal referenced to its own power supply GND. LED backlighting ensures excellent readability under low light conditions. The design of the housing allows the module to be easily snapped into a panel. The low cost module will suit high and low volume applications.

HOBBS Hour Meters

The 98000 Series LCD Hour Meters:

Provides a large easy-to-read display in a conventional size package. **Specifications:** • Operating Temperature: -40°C ~ 85°C • Operating Voltage: 9 ~ 64VDC • 6 digit display • Digit Height: 6mm

The 20000 Series Deluxe Hour Meters:

Totally sealed and benefits from an uncommon design which integrates the motor and frame into one substructure. **Specifications:** • Operating Temperature: -54°C ~ 68°C • Number Size: 3mm • UL Listed • CSA Certified

The 82000 Series Diochron Hour Meters:

Meter must be moisture resistant when submerged in water at 150°F for 3 minutes. **Specifications:** • Operating Voltage: 10 ~ 80VDC

(Loop Powered - No external voltage required.)

CTON Digital Panel Meters are low cost, professional looking meters for industrial and OEM applications. Voltmeter versions feature autozero on power up and can read both positive and negative DC voltages. Selectable decimal points allow easy voltage readings. LCD versions are available in either non-backlit (std. LCD) or backlit (Red, Green or Blue) for low light viewing. CTON's 4-20mA loop type meters are intended to interface with sensor inputs that require power from the meter to operate.

Sensors such as temperature, pressure, gas, airflow vibration, etc. can be used for loop meter monitoring. Use LCD meters for low power applications and long lifetimes or use LED versions for easier viewing in varying light conditions and different angles.

3.5 Digit LCD ***Specifications:*** • **Decimal Point:** User selectable 3-position • **Full Scale Ranges:** ±200mVDC, ±2VDC, ±20VDC • **Power:** 9VDC isolated @ 180µA, 5VDC @ 3mA • **Conversion Rate:** 2.5 per second • **Storage Temperature:** -10°C ~ 50°C • **Type:** Surface Mount • **Pins:** 13 or 10 pins, .64mm square on 2.54mm centers • **Backlit Power Options:** +5 VDC, ±5%, Red 165mA typical (200mA maximum); Green 115mA typical (160mA maximum) • **Backlit Connections:** Standard 2 solder pads • **Styles:** Surface/window or snap-in bezel mount

Miniature LCD ***Specifications:*** • **Annunciators:** 11 different user selectable annunciators: BAT, °C, °F, ~, m, µ, MΩ, KΩ, V, A, HOLD • **Decimal Point:** User selectable 3-position • **Full Scale Range:** Standard ±200mVDC, ±2VDC • **Power:** 9VDC isolated (7.2V-15V) at 150µA, 5VDC @ 5mA • **Conversion Rate:** 2.5 per second • **Storage Temperature:** -20°C ~ 70°C • **Type:** Snap-in Bezel Mount • **Pins:** Standard 26 pins, .46mm square, DIP style

4.5 Digit LCD ***Specifications:*** • **Annunciators:** 9VDC powered meters have "BT" when power <7.2VDC • **Decimal Point:** User selectable 4-position • **Hold:** Standard feature • **Full Scale Range:** ±200mVDC and ±2VDC • **Power:** 9VDC isolated @ 1mA, 5VDC @ 3.5mA • **Conversion Rate:** 2 per second • **Storage Temperature:** -10°C ~ 60°C • **Types:** Surface/window mount • **Pins:** 13 pins, .64mm square on 2.54mm centers

3.5 Digit LED ***Specifications:*** • **Type:** 7-segment light emitting diode (LED) • **Digits:** 0.56" (12.7mm) height • **Color:** Green or Red • **Polarity:** Displays (–) automatically • **Decimal Point:** User selectable 3-position • **Over/Under Range:** Over range displays "1" and under-range displays "-1" • **Hold:** Standard feature • **Full Scale Ranges:** ±200mVDC, ±2VDC, ±20VDC • **Configuration:** Bipolar, fully differential • **Power:** +5VDC, ±5% at 200mA • **Conversion Rate:** 3 per second • **Zeroing:** Automatic • **Operating Temperature:** 0°C ~ 50°C • **Storage Temperature:** -20°C ~ 70°C • **Relative Humidity:** 0 to 95% non-condensing • **Type:** Bezel Mount • **Pins:** Standard 10 pins, .64mm square on 2.54mm centers • **5-Year Unconditional Warranty**

Process Meter ***Specifications:*** • Meter and loop powered/controlled PCB in one unit • 3.5 or 4.5 digit • LCD and red or green LED • Fully scalable • 300Ω Impedance, nominal

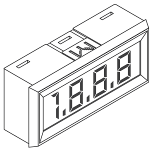
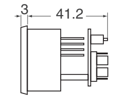
CTon Industries Epic Series

Voltage and Process Meters





(diagram shown is Rangeable version)

C-TON's industrial digital meters intended as replacement meters for many popular panel and process meters. Wide range of input voltages, display options and user selectable annunciators make these meters universal for use as voltmeters, temperature readings, pressure readings and percentage displays.

5 year Unconditional Warranty

SPECIFICATIONS: • **Display Type:** .45" (11.4mm) 7 segment LCD • **Annunciators:** °F, °C, PSI, %, user selectable • **Decimal Points:** User selectable • **Panel Cutout:** 1" x 2.4" • **Panel Clearance Required:** 1.25" (31.75mm) • **Input Ranges:** ±200mVDC, ±2VDC, ±20VDC • **Over/Under Range Indication:** 1.... / -1.... • **Configuration:** Bipolar Differential • **Performance Conversion Rate:** 3 per second • **Operating Temperature:** 0°C ~ 50°C • **Power Supply:** 5VDC @ 3.5mA • **Backlight Power:** 5VDC • **Mounting:** Snap-in bezel • **Connection:** 13 pins, 0.025" (.64mm) square on 0.100" (2.54mm) centers

PROCESS SPECIFICATIONS: • Meter and loop powered PCB in one package • **Panel Clearance Required:** 1.75" (44.45mm) • **Input Range:** Fully scalable • **Power Supply:** 4-20mA process loop • **Optional Backlight Power:** 5VDC or 24VDC • **Connection:** 2 pin screw terminals (4 pin with optional backlights)

RANGEABLE VOLTAGE SPECIFICATIONS: • 3.5 and 4.5 digit with high-contrast LCD display • **Input Ranges:** 0-5VDC, 0-10VDC or 0-200mvDC (selectable) • **Power Supply:** 12VDC or 24VDC regulated (selectable) • **Optional Backlight Power:** 24VDC @ 24mA • **Connection:** 6 screw terminal

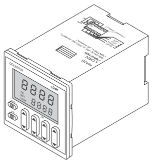
Panasonic Counters and Timers

Panasonic Electric Works

LC4H Digital Counters



Panasonic/Aromat's LC4H Digital Counters are presettable counters that will count up or count down until your preset count is reached, then trigger the internal relay to switch in one of seven output modes.

Features such as 2 color back-lit display and waterproof front panel display allow this counter to be used in extreme environments.

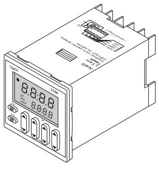
LT4H Digital Timers



Panasonic/Aromat's LT4H Digital Timer is intended for process control for applications requiring duration time control such as delay-on/off, repeat cycle and start/stop time accumulation.

The LT4H has features such as a bright 2 color back-lit display and EE-Prom memory, keeping your program settings without the need of an internal battery. The waterproof front panel keeps out dirt and water under poor operating conditions.

Timing from 0.001 second to 999.9 hours, with 8 modes of operation and built-in timed SPDT relay (5A 250VAC).

NEW! PM4H and PM5S Analog Timers

PM4H Series:

Features: • Front panel of IP65 type is protected against water-splash and dust • Multiple time ranges — 1s to 500h (max.) • Short Body — 62.5mm

Operation Modes: *PM4H-A:* • Pulse ON-delay • Pulse Flicker • Pulse ON-flicker • Differential ON/OFF-delay (1) (2) • Signal OFF-delay • Pulse One-shot • Pulse One-cycle *PM4H-S*: • Power ON-delay

PM5S Series:

Features: • Multiple time ranges — 1s to 500h (max.) • Slim Body — DIN 22.5mm • 0 Setting Instantaneous Output Operation • UL/C-UL/CE approval

Operation Modes: *PM5S:* • Pulse ON-delay • Pulse Flicker • Pulse ON-flicker • Signal OFF-delay • Pulse One-shot • Pulse One-cycle

Lightweight, high-performance aspherical glass lenses for various optical electronics applications.
Applications: • Pickup lens for optical drive devices • Collimator lens for laser beam printers • Coupling lens for optical communication systems • Image formation lens for sensors • Imaging device for CCD, CMOS
Features: • “One Shot” precision manufacturing process for an extremely compact, lightweight and high performance lens • High-quality processing and measurement techniques for superior performance • Short focal length for compact size • High numerical aperture achieved via aspherical design • Wide temperature and humidity range for increased reliability and stability • Various lenses and lens material available for many different applications
Specifications: • Operating Temperature Range: -30°C ~ 85°C

SPECIFICATIONS:

- Fluid Type: TN
- Background Color: Gray
- Viewing Direction: 6:00
- Display Mode: Reflective
- Operating Voltage: 3.0 ~ 5.0VAC
- Operating Temperature: 0°C ~ 50°C
- Storage Temperature: -20°C ~ 70°C
- Can be driven with the CD4543BE

Note: 4" display does not have decimal point. Pin count varies with display height.

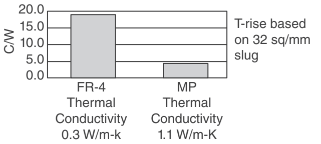
Thermal Clad LED IMS® Boards



Thermal Impedance of FR4 compared to MP

Bergquist offers a family of standard thermally conductive insulated metal substrate (IMS) circuit boards specifically for LED applications which replace conventional FR-4 PCBs. Better thermal management allows more forward current to be applied to the LED, while still maintaining desired die temperatures, which means more light and possibly reducing the number of LEDs required to achieve the desired light output. Star or square substrates are available in single, strip or array configurations. Choose from different LED footprints to give you the freedom to select the LED component's color, brightness and power that best suits your needs.

Specifications: • Base metal: 1.57mm (0.062") Aluminum 5052 • Thermally Conductive Dielectric: .076mm (3 mil) MP • Copper Circuit Foil: 35μm (1 oz. copper circuit foil • Surface Finish: White solder mask, Pb-free HASL solder pads

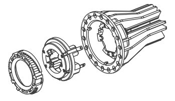
LED Star Board Holder/Heat Sink



The Star Board Holder is designed to house and provide electrical interconnection and thermal solution for a high-power LED star printed circuit (pc) board light source. The star board holder consists of a heat sink, locking ring, and contact carrier assembly. The star board holder is capable of two-contact loading for single-color LEDs and three-or four-contact loading for full-color (RGB) LEDs (common anode or common cathode). The contact carrier assembly and heat sink are marked with A, B, C, and D to reference the polarity of the LED to ensure proper orientation in the lighting fixture.

A99505-ND (2008675-1)	Star Board Holder/Heat Sink	**$18.63**
A99798-ND (2008671-1)	Lens for Star Board Holder	**$3.60**
A99838-ND (2058329-1)	Thermal Pad for Star Board Holder	**$.43**

Low and High Intensity LED Light Pipe

Linear light source using a TE proprietary large core optical fiber rod that projects a band of light along the entire length of the light pipe using one or more LEDs. **Applications:** • Accent/ Trim lighting found in commercial building, industrial, appliance, rail, motor vehicle and commercial aircraft **Electrical: High Intensity Light Socket:** • Operating Voltage: up to 50V maximum • Operating Current: up to 2500mA • Maximum wattage: up to 5 watts is possible; **Low Intensity Light Engine:** • Input Voltage: Universal 7 ~ 27VDC • LED Wattage rating: 1/2 watt **Materials:** Light Pipe: • Clear and white acrylic **Low Intensity Light Assembly:** • Housing: PBT • PCB: FR4; **High Intensity Light Socket Assembly:** • Contact carrier: PBT • Locking ring: PBT • Contacts: Copper alloy - Tin plated • Heat Sink: Cast aluminum

NEW! G13 Style SMT Assembly and End Cap Cover

The G13 Style SMT Assembly and End Cap Cover are designed for use on printed circuit board LED strip lighting modules in T8 and T12 fluorescent retrofit LED tubes. **Applications:** • Standard T8 and T12 fluorescent fixtures **Electrical:** • Operating Voltage: 250VAC/250VDC • Operating Current: 2 AMPS • Dielectric Withstanding Voltage: 1500VAC **Mechanical:** • Operating Temperature: -40° ~ 120°C • Mating Cycles: 10

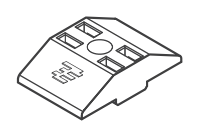
NEW! Board-to-Board Screw Down Jumper Assembly



The board-to-board, screw down jumper assembly provides the electrical connection between two adjacent printed circuit boards in a string of printed circuit boards. **Applications:** • T8-T12 fluorescent retrofit LED bulbs • LED lighting strips • LED lighting controls • Channel lettering **Electrical:** • Operating Voltage: 250VAC/250VDC • Operating Current: 5 AMPS • Dielectric Withstanding Voltage: 1500 VAC **Materials:** • Housing: UL 94 VO Thermoplastic • Contact: Tin plated copper alloy • ETL Recognized, File No. 3178692CRT-001 ~ UL (1977)
Mechanical: • Operating Temperature: -40°C ~ 105°C • Mating Cycles: 10 • Screw down torques: 0.11 Nm (0.97 Lb-In) max

Inverted SMT Thru Board Connectors

The inverted SMT Thru Board Connector provides a means to bring power to LED aluminum clad and FR4 boards from the underside of the PC board.

Applications: • LED lighting controls • Indoor and outdoor lighting fixtures • General LED illumination fixtures • Various non-lighting applications that require wire dress connections below the PC board **Electrical:** • Operating Voltage: 50VAC/50VDC • Operating Current: 3A for #24AWG, 2.5A for #26AWG, 1.5A for #28AWG **Materials:** • Housing: UL 94V-O rated thermoplastic • Contact: Tin over nickel plated copper alloy

Mechanical: • Operating Temperature: -40°C ~ 105°C

Feature: • Accepts 2 thru 6 position TE mini CT Connector

Poke-In LED Lighting Connectors

The low profile SMT and Through-Hole Poke-In wire connectors are designed for lighting applications. They accept 18, 20 and 22 AWG solid wire, 18 and 20 AWG pre-bond stranded wire, and 18AWG stranded wire. **Applications:** • LED lighting controls • General illumination LED fixtures • Interconnecting strings of printed circuit LED light modules • Various non-lighting applications that require attaching flying leads to printed circuit boards **Electrical:** 250VAC/5A, 250VDC/5A, 1500VAC dielectric withstanding voltage **Mechanical:** • Operating Temperature: -40°C ~ 105°C • Wire Retention: 5 pound minimum **Materials:** • Housing: UL 94-VO rated high temperature resistant thermoplastic • Contacts: Tin over nickel plated copper alloy

NEW! IDC SSL Connectors

The IDC SSL connector series are insulation displacement (IDC) SMT and thru-hole wire-to-board connectors designed for quick, tool-less termination of discrete wires onto LED printed circuit boards. These connectors use Tyco Electronics proven insulation displacement technology to provide a robust, stable electrical and mechanical power connection to single or multiple printed circuit boards in solid state lighting and non-lighting applications.

Applications: • General illumination LED fixtures • Connecting strings of pcb LED light modules • LED lighting controls • Non-lighting wire-to-board applications

Electrical: • Maximum Operating Voltage: 250VAC/250VDC • Operating Current: 8 AMPS (18 AWG only) • Dielectric Withstanding Voltage: 1500VAC

Materials: • Housings: 94 VO rated high temperature resistant thermoplastic • Contact: Tin over nickel plated copper alloy

Standards and Specifications: UL 1977

Mechanical: • Operating Temperature: -40°C ~ 105°C • Wire Retention: 5 lbs. minimum

NEW! SlimSeal SSL Connectors

The SlimSeal SSL connectors are low profile, single row connectors developed for indoor and outdoor LED lighting applications. These connectors provide low power, sealed solutions for free hanging, wire-to-wire interconnects and for robust, stable electrical and mechanical wire-to-board connections used in solid state lighting.

NEW! Low Voltage DC Grid Interconnects

LVDC Grid Interconnects are low voltage direct current (DC) connectors and cable assemblies developed to transfer power to and from lighting fixtures, power supplies, controls and other electrical devices intended for use in an EMerge Alliance® compliant system. LVDC Grid Interconnects were designed specifically to meet the requirements of the EMerge Alliance® Standard, a new power distribution platform for the use of safe, low voltage DC Power in commercial interiors. **System Advantages:** Provides a plug and play standard for integrated management and control of more energy efficient and individually controllable devices such as LED lighting and other digital devices.

Mechanical: • Environmental Operating Temperature: -55°C ~ 85°C **Electrical**: • Operating current: Up to 4.1 Amps • Operating Voltage: 24 Volts DC (nominal) **Materials**: • Housings: Thermoplastic • Contacts: Phosphor Bronze • Finish: Tin over nickel **Standards and Specifications**: • EMerge Alliance® System Standard (Pending) • UL2577 • ANSI/NFPA 70 • Application Specification: 114-13275 • Product Specification: 108-2414

APEM Q Series LED Indicators

APEM's LED indicators are designed and manufactured in the UK. The range comprises of seven different panel cut-out sizes (6mm, 8mm, 12mm, 14mm, 16mm, 19mm, and 22mm), and three different bezel shapes; prominent, recessed and flush manufactured from high quality brass either finished in Bright Chrome or Black Chrome. Terminations are 2.0/2.8mm faston/solder lugs. The LEDs are available in five color options, standard diffused red, green, yellow, blue and white, plus Tri-color options in 8mm, 14mm, 16mm, 19mm, and 22mm. The LED indicators are available with integral resistors to permit direct connection to 12V, 24V, and 110V. **Features:** • Operating Temperature Range: -40°C ~ 85°C • IP67 Panel Seal

Chicago Miniature Lighting, LLC
Lighting the world since 1910

LED Incandescent Replacements

Chicago Miniature Incandescent replacements have extremely high brightness with low current draw. Long life typically 100K hours vs. 10K hours. Storage Temp: -25°C ~ 80°C Ambient Temp: -20°C ~ 60°C

Fig. 1

Replaces incandescent lamps:
- 12VDC 394, 330, 382
- 24VDC and 28VDC 327, 376, 385, 387

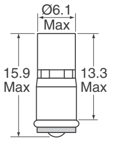

Fig. 2

Replaces incandescent lamps:
- 12VDC 336, 386, 393
- 24VDC and 28VDC 276, 334, 388

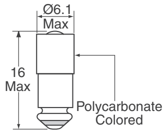

Fig. 3

Replaces incandescent lamps:
- 12VAC/DC 18, 37, 70, 73, 74
- 24VAC/DC and 28VAC/DC 17, 85

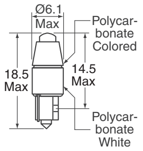

Fig. 4

Replaces incandescent lamps:
- 12V AC/DC 192, 124, 158, 161, 168, 193, 194, 658, 184
- 24V AC/DC and 28V AC/DC 152, 400, 464, 585, 655, 656, 657

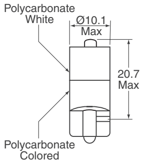

Fig. 5

Replaces incandescent lamps:
- 12V AC/DC 12MB, 181, 756, 1488, 1815, 1894, 1889, 1891, 1893, 1898
- 24V AC/DC 24MB, 1437, 1818
- 28V AC/DC 313, 757, 1819, 1820, 1829, 1843, 1864, 1873

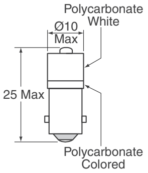

Fig. 6

Replaces incandescent lamps:
- 24V AC/DC 24MB, 1437, 1818
- 28V AC/DC 313, 757, 1819, 1820, 1829, 1843, 1864, 1873

† For Tape and Reel part number, change 1-ND to 2-ND.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

molex NEW! Helieon™ Sustainable Light Modules

Helieon Sustainable Light Module combines industry leading solid state lighting technology with innovative, easy-to-use interconnect technology delivering to interior and exterior luminaire manufacturers effortless installation, interchangeability and upgradeability. Helieon is one of the industry's highest quality, most cost effective solid state lighting solutions, and it will change the way LED lightning solutions are used. Helieon also helps lighting manufacturers reduce energy costs and environmental waster for a sustainably designed lighting environment. Helieon Sustainable Light Module has an average lumen maintenance of 50,000 hours. 10 year lifespan based on 12 hours of use per day/365 days per year.

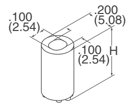
Molded and Self-Retaining LED Mounts



Features:
- One universal style for both T-1 (3mm) and T-1 3/4 (5mm) LEDs
- Internal tapered divider prevents leads from shorting

Material Specifications:
- UL Rated 94V-0, Color: Black, 33% GF Polyphalamide (PPA)

.8” Big Lamps with Universal Sphere Lens

Features:

RoHS COMPLIANT

- High luminous intensity
- Categorized for luminous intensity
- Excellent on-off contrast
- Operating Temperature Range: -25°C ~ 85°C

LITEON Displays

Fig. 1

Alphanumeric Displays

FEATURES:

- Low power requirements
- Excellent character appearance
- High contrast and brightness
- Wide viewing angle
- Categorized for luminous intensity

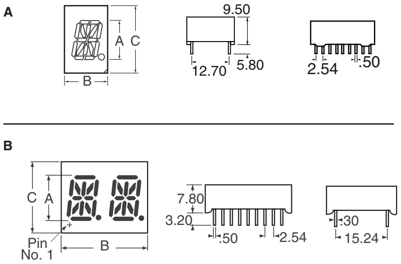

Fig. 2

Ultra-Large 7-Segment Displays

FEATURES:

- Continuous uniform segments
- Excellent character appearance
- High contrast & brightness
- Wide viewing angle
- Categorized for luminous intensity

Power LEDs

The LOPL (Lite-On Power LED) Emitter I is a 1W power LED package which is a point light source with more energy efficiency than incandescent and halogen lamps.

The LTPL (Lite-On Power LED) is a revolutionary, energy efficient and ultra compact new light source, combining the lifetime and reliability advantages of Light Emitting Diodes with the brightness of conventional lighting. It gives total design freedom and unmatched brightness, creating a new opportunity for solid state lighting to displace conventional lighting technologies.

Features:
• High power LED light source • Long life, up to 100k hours • Instant light (less than 100ns) • Low voltage DC operated • Low thermal resistance

Applications:
• Portable lights • Traffic signaling • Backlighting • Interior and exterior automotive lighting • Decorative and landscape lighting • Medical illumination

Flashers

RoHS COMPLIANT

Series 5100H Flasher

Features: • Built-in flashing circuit • Flashing rate: 1.5 - 2.5 Hz • No external resistor required **Mounting:** Will snap fit in 6.32/6.45mm dia. hole in panels .79/1.57mm. **Wire Leads:** No. 24 AWG, 152.40mm insulated, bonded strands, stripped 12.70mm. **Anode (+):** Red Lead **Housing:** Black Nylon

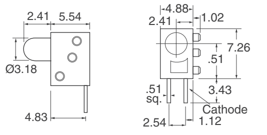
T1 Modular LEDs

Features: • Mount up to 12 LEDs in one operation • Unitized vibration resistant package • Black housing for high contrast background • Wide viewing angle • Vertical or horizontal positioning • Interlocking construction • Hi brite diffused LEDs • Speeds mounting for increased productivity and reduced cost



Mount from 1 to 12 circuit board indicators, as a single unit. Unique snap-together feature.

LED Lenses

RoHS Compliant Parts Available

These LED lenses provide quick, economical panel mounting as well as ESD protection. Molded in Fresnel rings provide a wide viewing angle.

Fig. 2

Light-Line™ LED Strip Light

RoHS

Features: • 18" (450mm) LED strip light complete with mounting base, screw holes and lens • 2 versions: Cool White and Warm White

Applications: • General illumination • Signage • Retail lighting • Furniture lighting • Fluorescent replacement

Specifications: • Power consumption: 12 watts • 12 volts • Current draw: 1A • Lifetime: minimum 50K hours at 70% Lumens • Operating Conditions: 45°C Maximum

LEDIL

LED Lenses

Features:
- Lens material optical grade PC and PMMA with high UV and temperature resistance
- High optical efficiency
- Even color distribution over the whole beam angle

† For Tape and Reel part number, change 1-ND to 2-ND. ‡ Bulk § For Tape and Box part number, change 1-ND to 3-ND; Tape and Box pricing shown.

(Continued)

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

1-Watt Cup Series

OPTEK Lednium Solid State Lighting products package the highest quality LED chips. Typically, the lumen output of these can be as high as 70% after 50,000 hours of operation. That is, the percentage of the initial light output still being emitted after a specified operating time. This prediction is based on specific test results and tests on similar materials, and relies on strict observation of the design limits and ratings. **Specifications:** • Input Current: 1.0A • Junction Temperature: Tj = 130°C • Viewing Angle at half maximum intensity: 135°

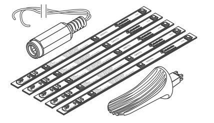
Power Line Designer Kit



The self-contained Power Line Designer Kit is a flexible and scalable lighting solution using mid-power LEDs to supply high luminous flux without additional heatsinking requirements. The kit includes components and instructions to allow a designer to configure LED placement as needed for uniform illumination in an application. With a 15-volt power supply, the Power Line Kit is a total lighting solution. **Applications:** • Architectural accent lighting • Under-counter lighting • Media illumination • Lighting for large channel letters • Backlighting for light boxes • Point-of-sale displays **Kit includes:** • Five PCBs 8" in length • Populated with three 0.5-watt white LEDs • Wire harness with connector • Hand insertion tool

365-1483-ND (OVPL5W3K) **$35.10**

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic® Surface Mount LEDs

The chip LEDs have thin, compact features available for surface mount technology. Super bright with wide viewing angle and is suitable for compact and multi-function equipment.

Features: • Compact and thin package • Super bright • High reliability • Surface mount technology available • Wide product range

Cleaning: Avoid using organic solvents. The surface of the LED may change when organic solvents such as trichloroethylene and acetone come in contact with the surface of the LED.

† The condition of I_{FP} is duty 10%, pulse width is 1 msec.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic® Blue LEDs

High Brightness

Max Ratings:

Power Consumption: 120mW
Forward Current: 30mA
Reverse Voltage: 5V
Operating Ambient Temperature: -25~80°C
Storage Temperature: -30~100°C
Water clear lens when off.

Blue LED Precautions in Handling:

A blue LED is sensitive to static electricity and care should be fully taken in handling it. Particularly, when an overvoltage is applied, which exceeds the absolute maximum rating of the blue LED, its energy damages the LED.
